

BACKBONE

For two billion gamers...

This is the next Xbox.

Your phone is **literally more powerful** than the world's fastest-selling console. 🙄

	iPhone	Nintendo Switch
GPU	Apple A14 Bionic	Nvidia Tegra X1
Memory	256GB (base)	32GB
RAM	4GB	4GB
Resolution	2532 x 1170	1280 x 720 (handheld)
Runs Fortnite at...	60fps	30fps

In 2020, mobile games generated

\$86.3B

(That's 49% of the global gaming market 📈.)

Everyone—including Microsoft, Google, and Apple—is focused on bringing great core games to mobile.

Everyone is Trying to be The Netflix of Gaming. 🎬

Microsoft is launching the Xbox Series X alongside Xbox [Game Pass](#) on mobile.

Sony is bringing PlayStation titles to mobile in Q1 2022 and investing in streaming through PS Remote Play.

Apple is investing in a games subscription called [Apple Arcade](#).

Nvidia is investing in cloud gaming with GeForce Now.

EA is investing in cloud gaming with EA Access.

Google is investing in core gaming through Google Play Pass and Stadia.

Nintendo is investing in cloud gaming with [Nintendo Switch Online](#).

Amazon is investing in cloud gaming with Amazon Luna.

But **nobody** is thinking about how to actually make the experience of playing these games fun. 🤔

We've created one place for all the things we play.

Amazon Luna

Nvidia Geforce Now

Google Stadia

Xbox Game Pass

3P App Store

Apple Arcade

PS Remote Play

“The way that Backbone unifies gaming experiences across AAA iOS ports like Warzone or Minecraft, Xbox and Playstation Remote Play and now native xCloud games feels like **the way of the future for mobile gaming in a way that none of the individual players has managed to get right...**”

- **Matthew Panzarino**
Editor-in-Chief, TechCrunch

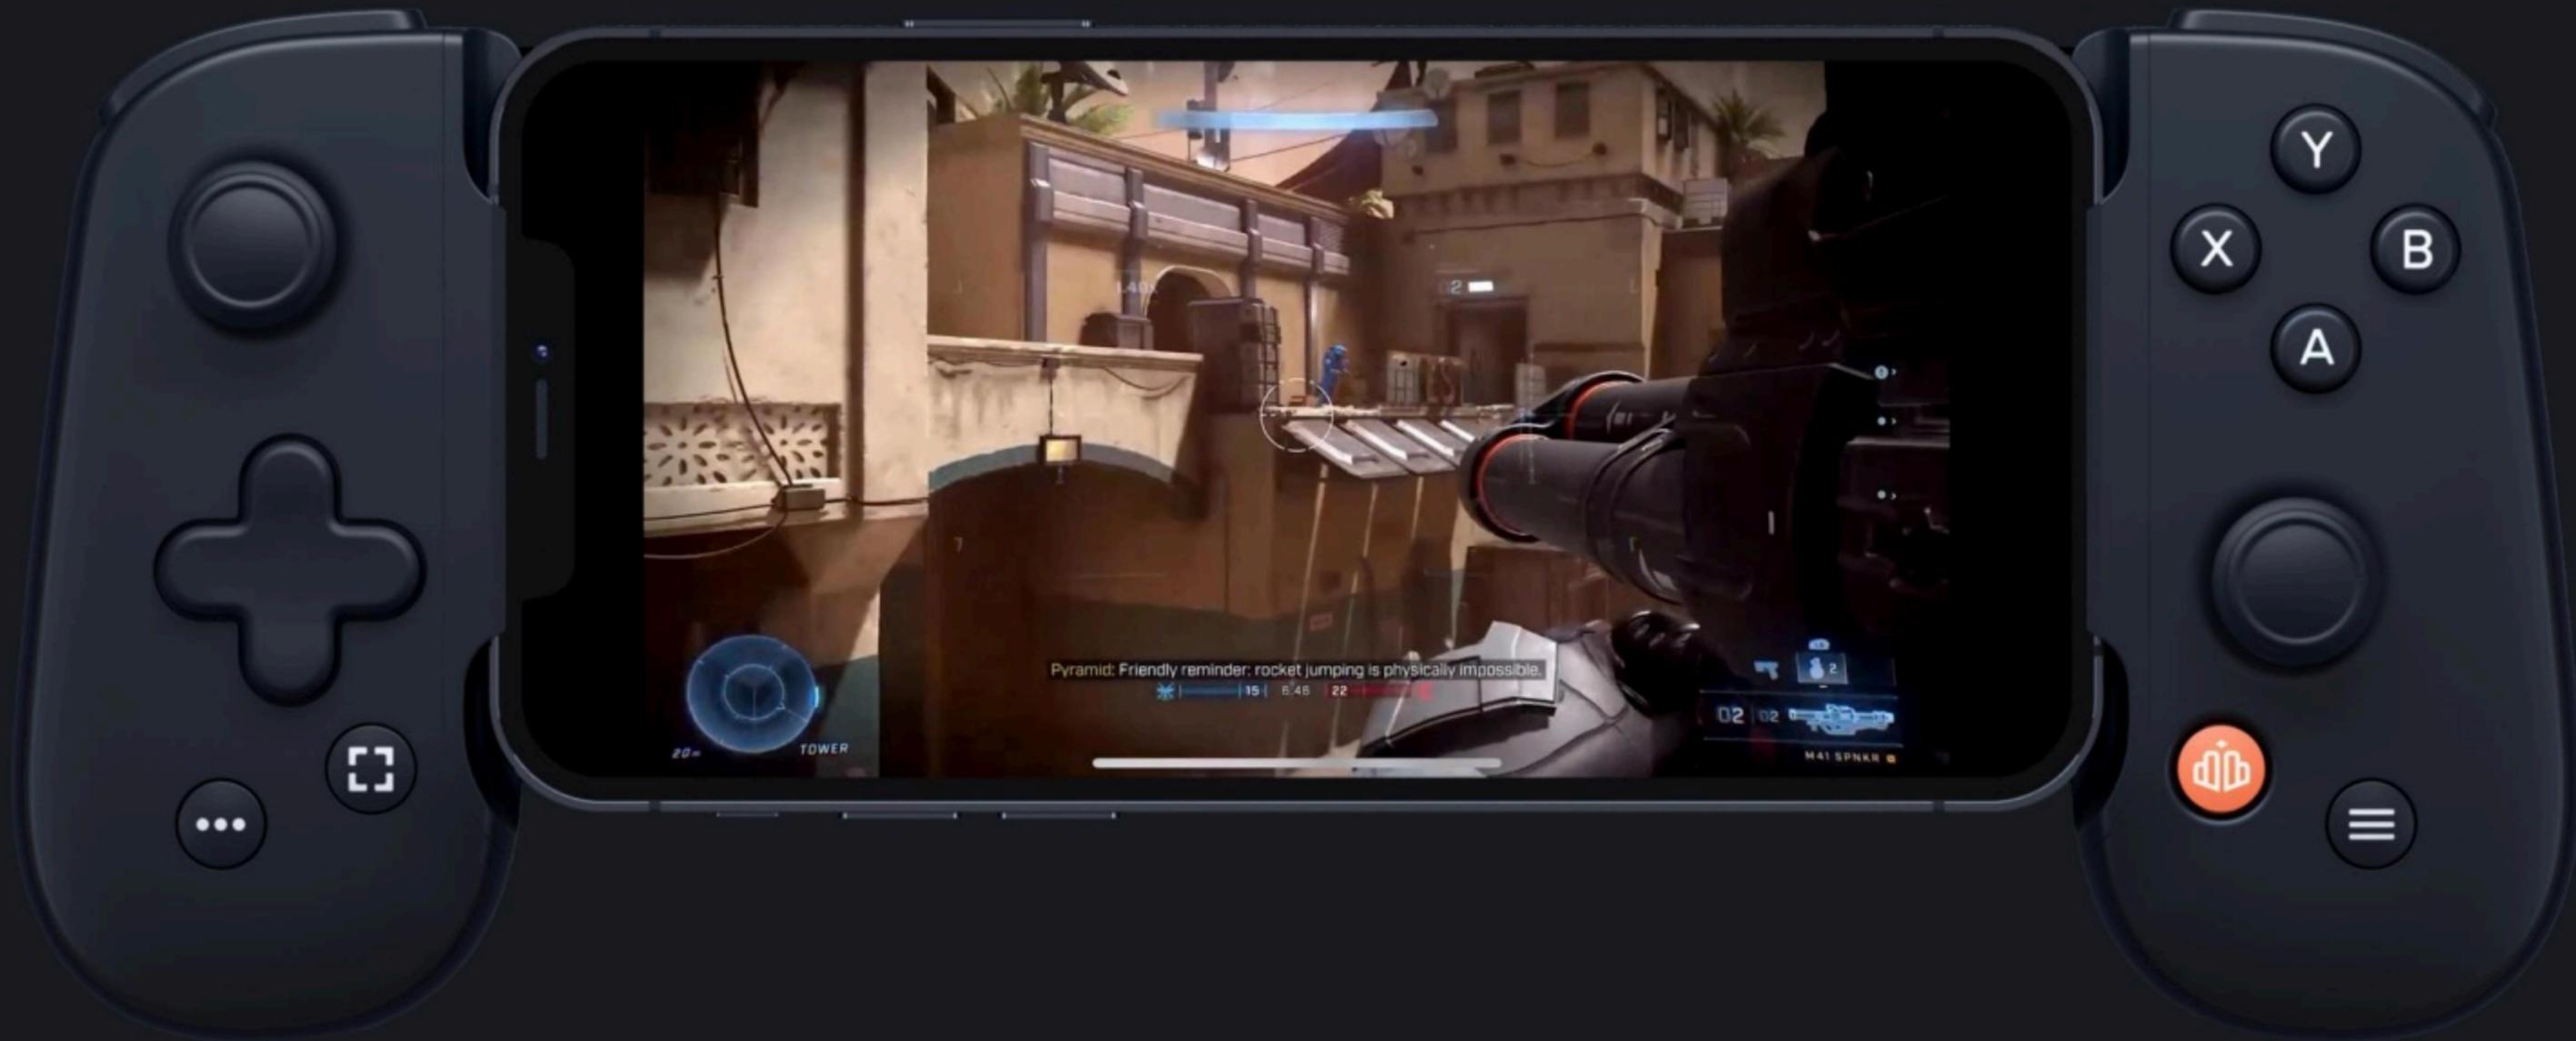

Backbone's core offerings:
