REINVENTING BUSINESS LENDING

EMBEDDED

DIGITAL

REAL-TIME

DYNAMIC

Business lending as it is today

- An applicant for a business loan must still meet the following criteria:
 - **Maturity:** 3 years plus credit history
 - **Profitability:** Ideally two out of the years have been profitable
 - **Data basis for credit decision:** Historical 3 years and management accounts
 - **Credit Decision:** Manual interaction and cumbersome process
 - **Experience:** Frustrating and lengthy for *customer* - at the same time costly and inefficient for *lender*
- Repayments are fixed and do not adjust to business performance

This is how business lending should be

EMBEDDED

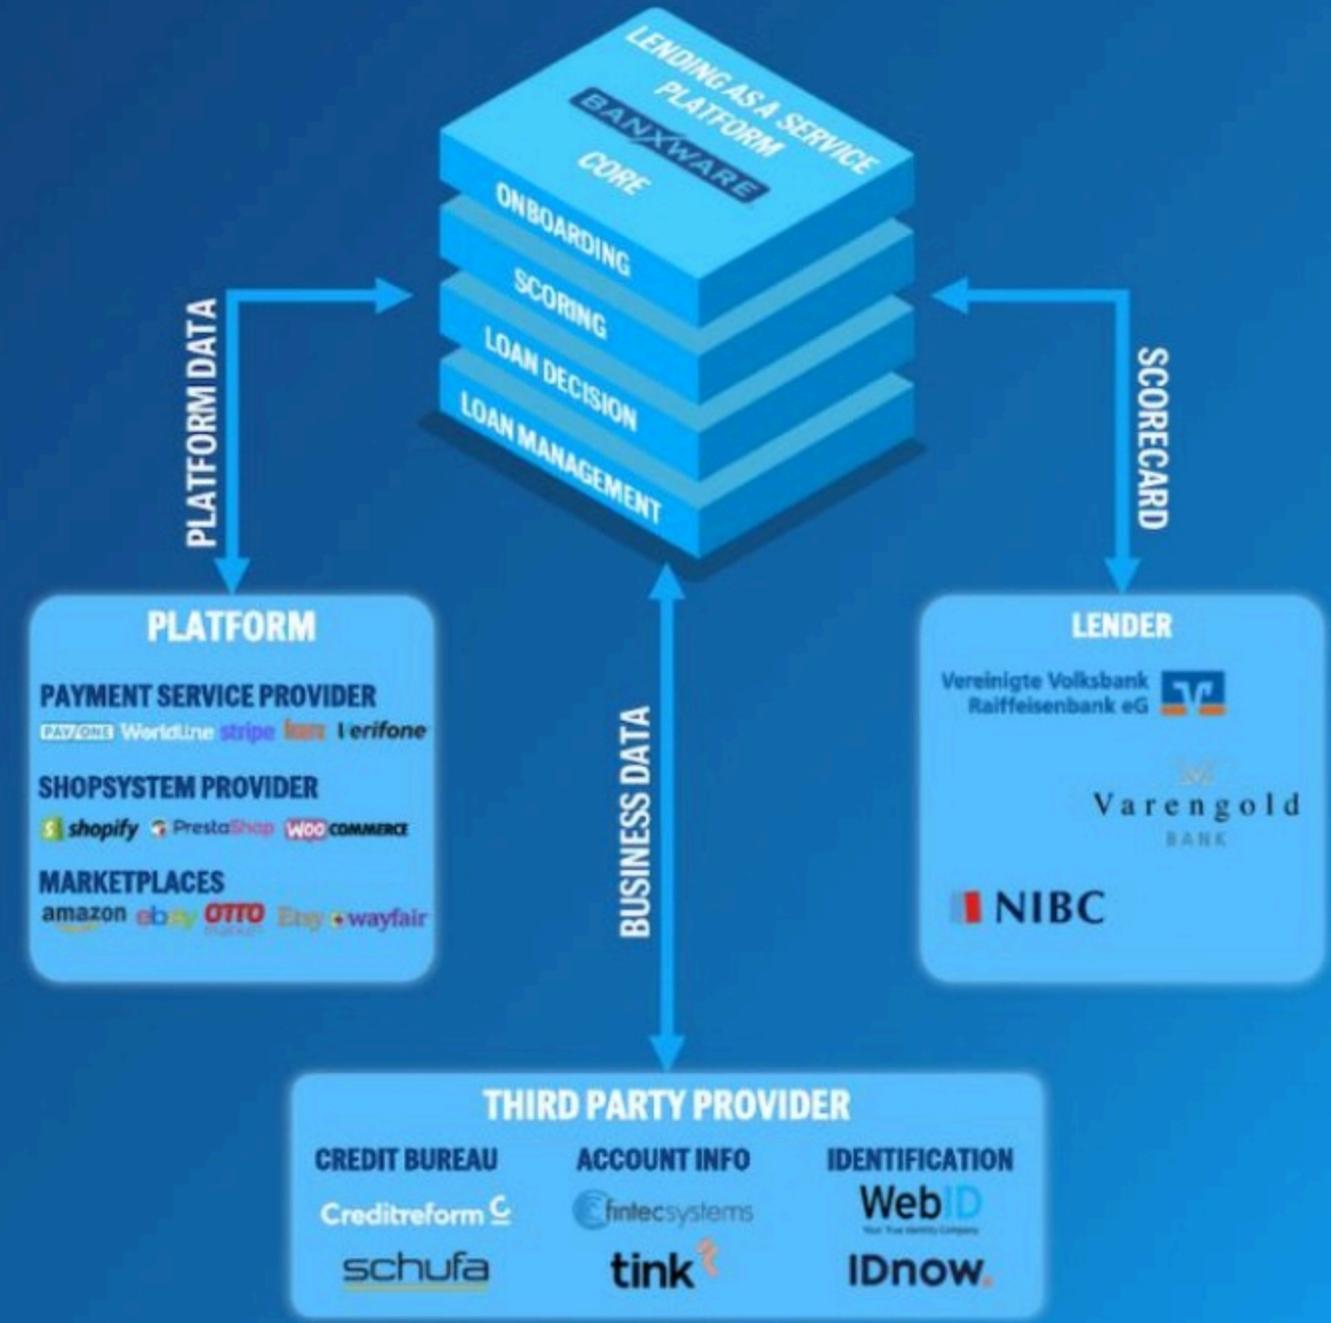

- Seamlessly and conveniently integrated into any non-financial business or service
- Loan application in the merchant's comfort zone
- Giving merchants VIP treatment with their financial needs, tailored to their industry

REAL-TIME & FULLY DIGITAL

- Score loan applicants' data via API to third-party providers and platforms to make instant decisions
- Speed and Convenience: Manage loans end-to-end, from drawdown to collection - fully automated, without any human interaction

DYNAMIC

- Loan offer depends on recent monthly revenues - so does repayment
- Dynamic repayment adjusting to revenue performance of merchant
