

DECODING MENTAL HEALTH

Digital Precision
Medicine for
Mental Health

Mental illness will be the **leading cause of disability** by 2030¹ costing **\$6 Trillion**

1 out of 4 of us will experience a **mental disorder**¹

>45% of patients with chronic conditions struggle with **behavioral health**²

PROBLEM

No objective
monitoring
for mental health

Feel's proprietary **Digital Precision Medicine Platform** brings continuous and passive monitoring to mental health.

Continuous Monitoring

Proprietary Algorithms

Digital Biomarkers

SOLUTION | LINKING REMOTE MONITORING WITH PRECISE INTERVENTION 24/7/365

PUBLICATIONS

Outcomes of Feel DTx for Depression and Anxiety

Precision DTx delivers superior improvement in outcomes in depression and/or anxiety

[Read Publication](#)

Precision and accuracy of emotional state detection and recognition

87% precision in detecting changes in the mood state of patients in psychiatry

[Read Publication](#)

Psychophysiological index for Stress Resilience

Psychophysiological index for Stress strongly correlates with changes in Cortisol levels

[Read Publication](#)

Psychophysiological index for Stress

Electrodermal Activity (EDA) can be a stress resilience metric in stressful conditions

[Read Publication](#)

Psychophysiological index for Stress

Psychophysiological index for Stress strongly correlates with changes in the Endocannabinoid System

[Read Publication](#)

Outcomes of Feel DTx for ADHD

Precision DTx shows improvement in mental health outcomes for ADHD populations

[Read Publication](#)

Digital Biomarker for Detection of ADHD

Detection of ADHD utilizing physiological signals from wearables

Publication Pending

PATENTS

Emotion
Detection

Patent for detecting changes in the mood state of an individual based on physiological & digital data

Patent No:
US1141068282

Emotion
Detection 2

Method for detecting and recognizing an emotional state of a user (Continuation)

Patent Granted

ADHD Digital
Biomarker

Method for characterizing, detecting, and monitoring ADHD

Patent pending

Insomnia Digital
Biomarker

System and method for characterizing, detecting, and monitoring insomnia

Patent pending

Depression
Relapse Digital
Biomarker

System and method for characterizing, detecting, and monitoring relapse in depression

Patent pending

CITATIONS

PRE-SERIES A FUNDRAISING

\$1M left in a
\$3.5M round to
reach an
inflection point

EXISTING ROUND

- Closed \$2.5M led by expert Neurotech investors (Satori Neuro)

SATORI  CAPITAL

METAVALLON

SUSV

 SeedtoB

Terms: Convertible Note with \$30M Cap and 20% Discount

MILESTONES

- FDA approval of our wearable as a 510k class II medical device

Empatica closed their series B financing from Sanofi after receiving FDA clearance for a similar device

empatica 

- Launch as a Drug+ in the market & clearance of Feel DTx program as an adjunct to medication

Recent FDA clearance of DTx for the Adjunctive Treatment of MDD
