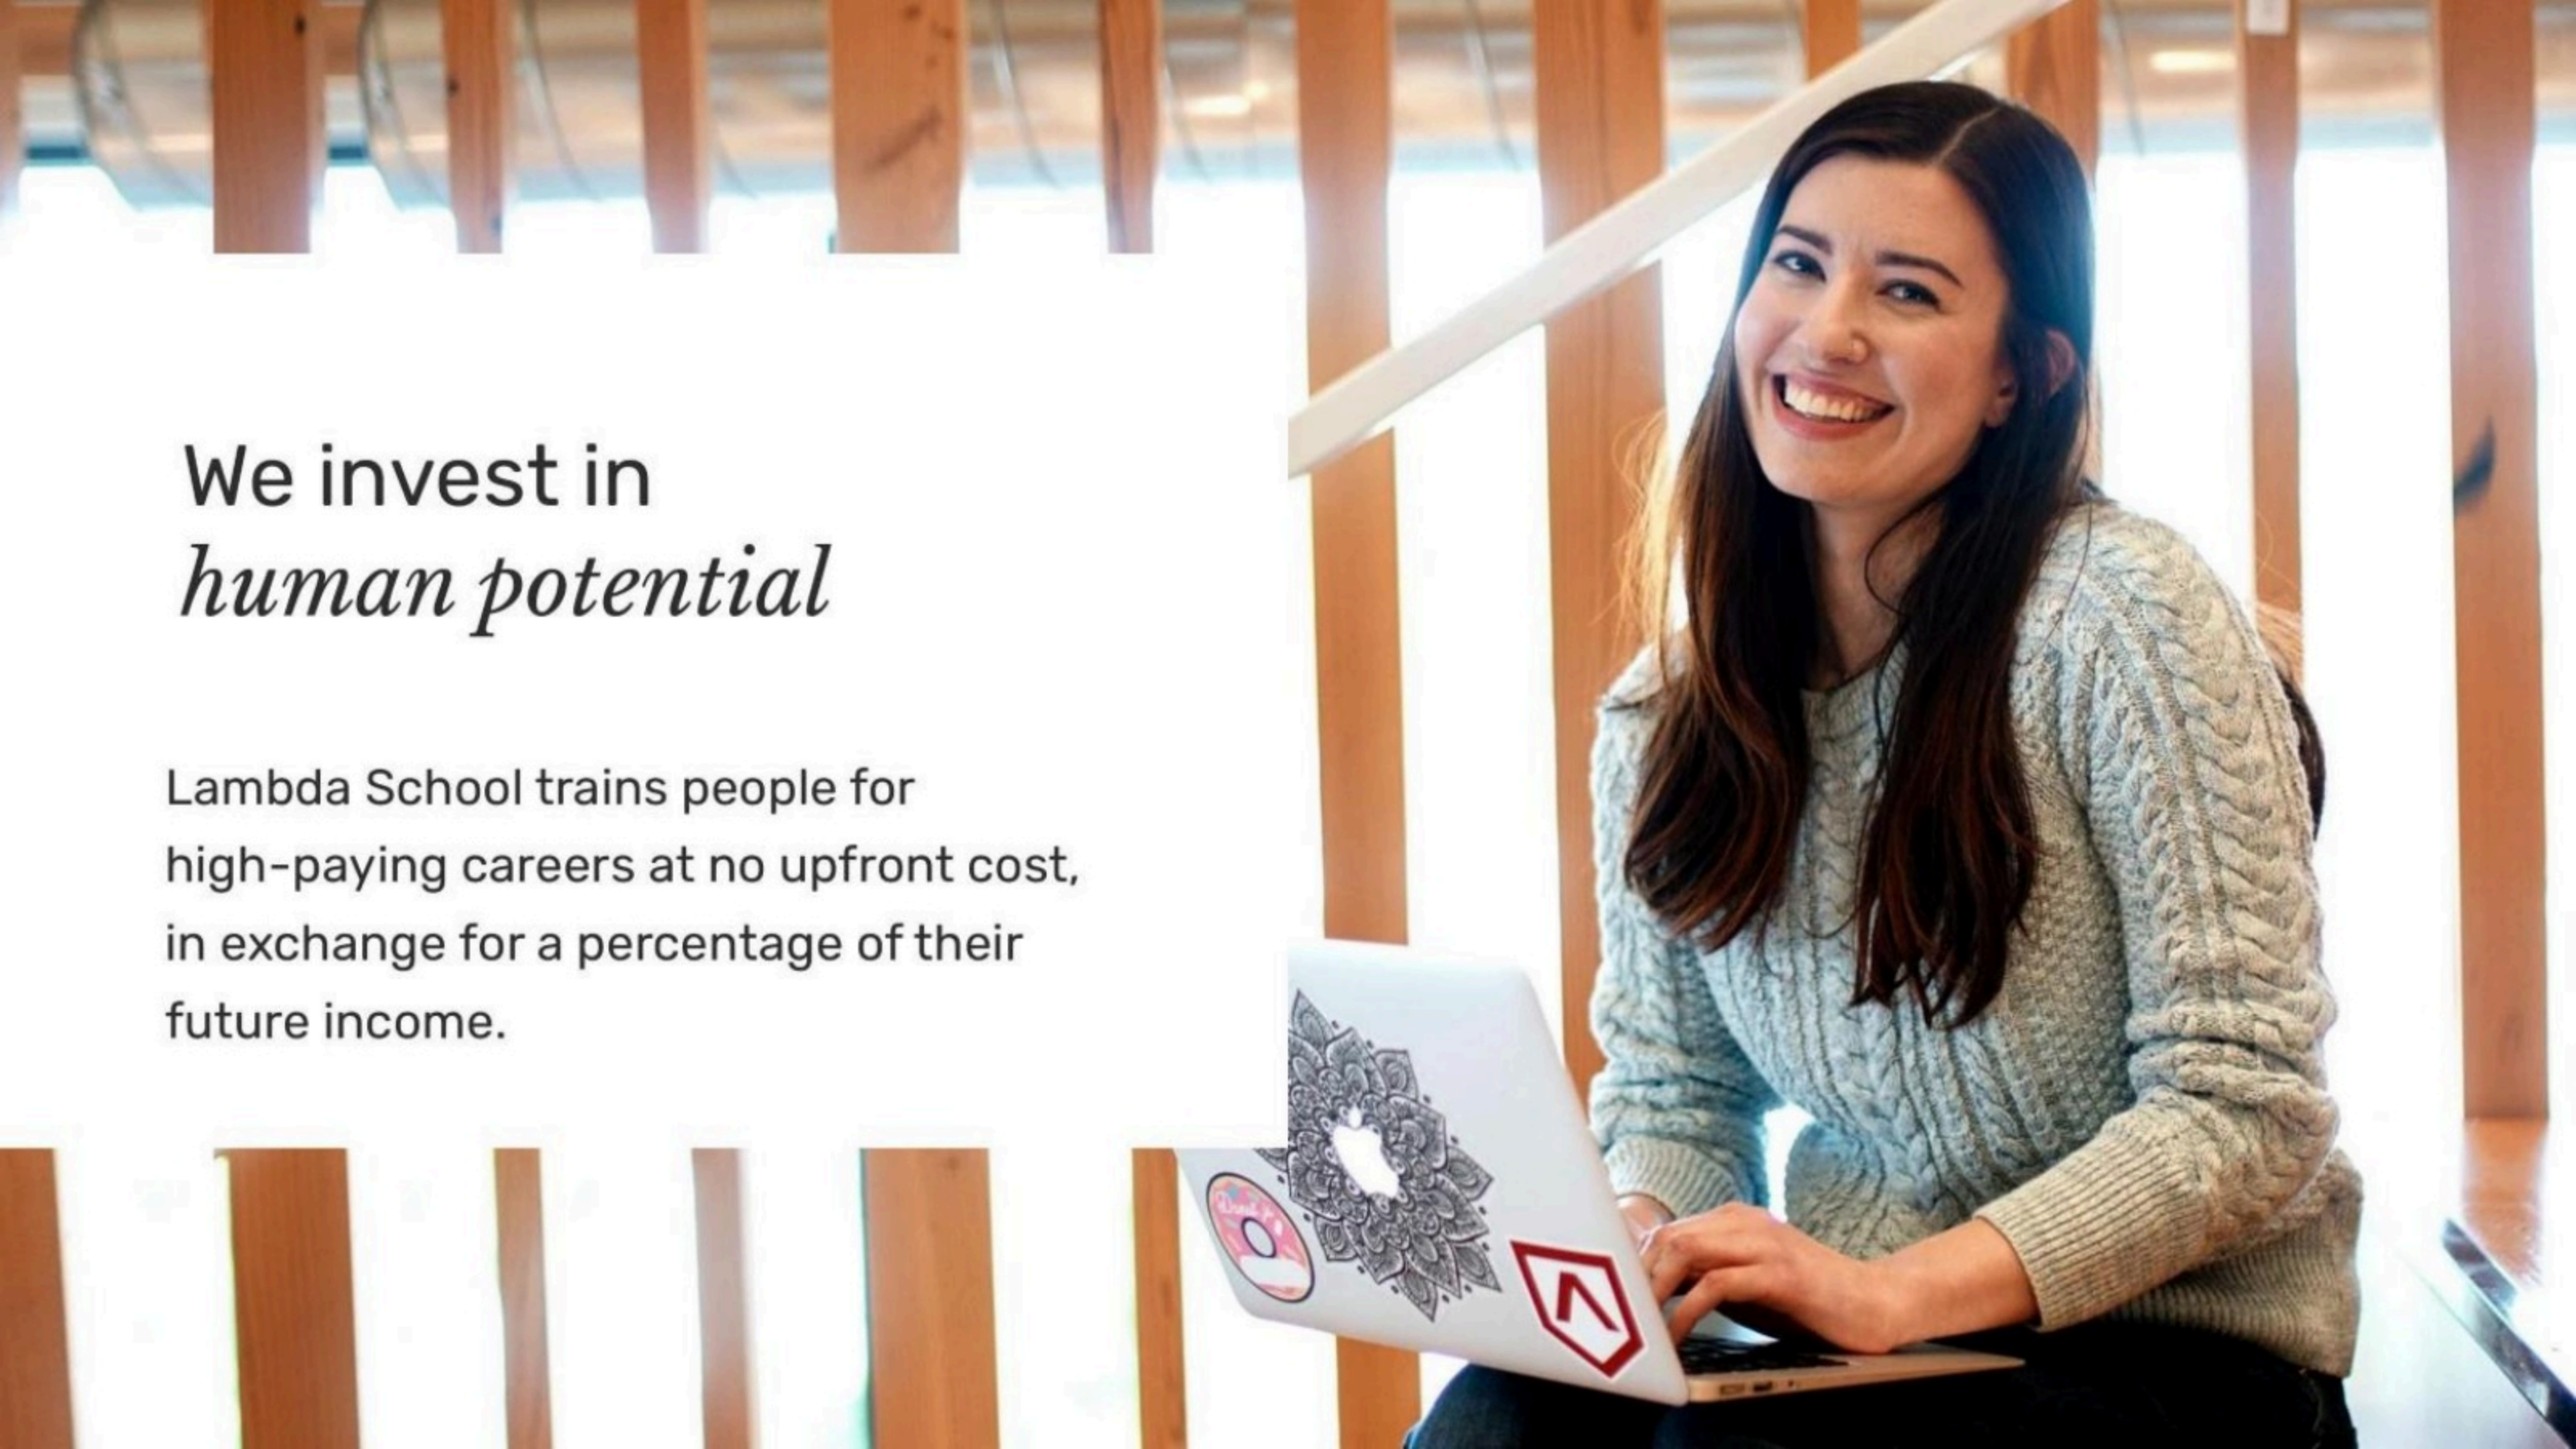
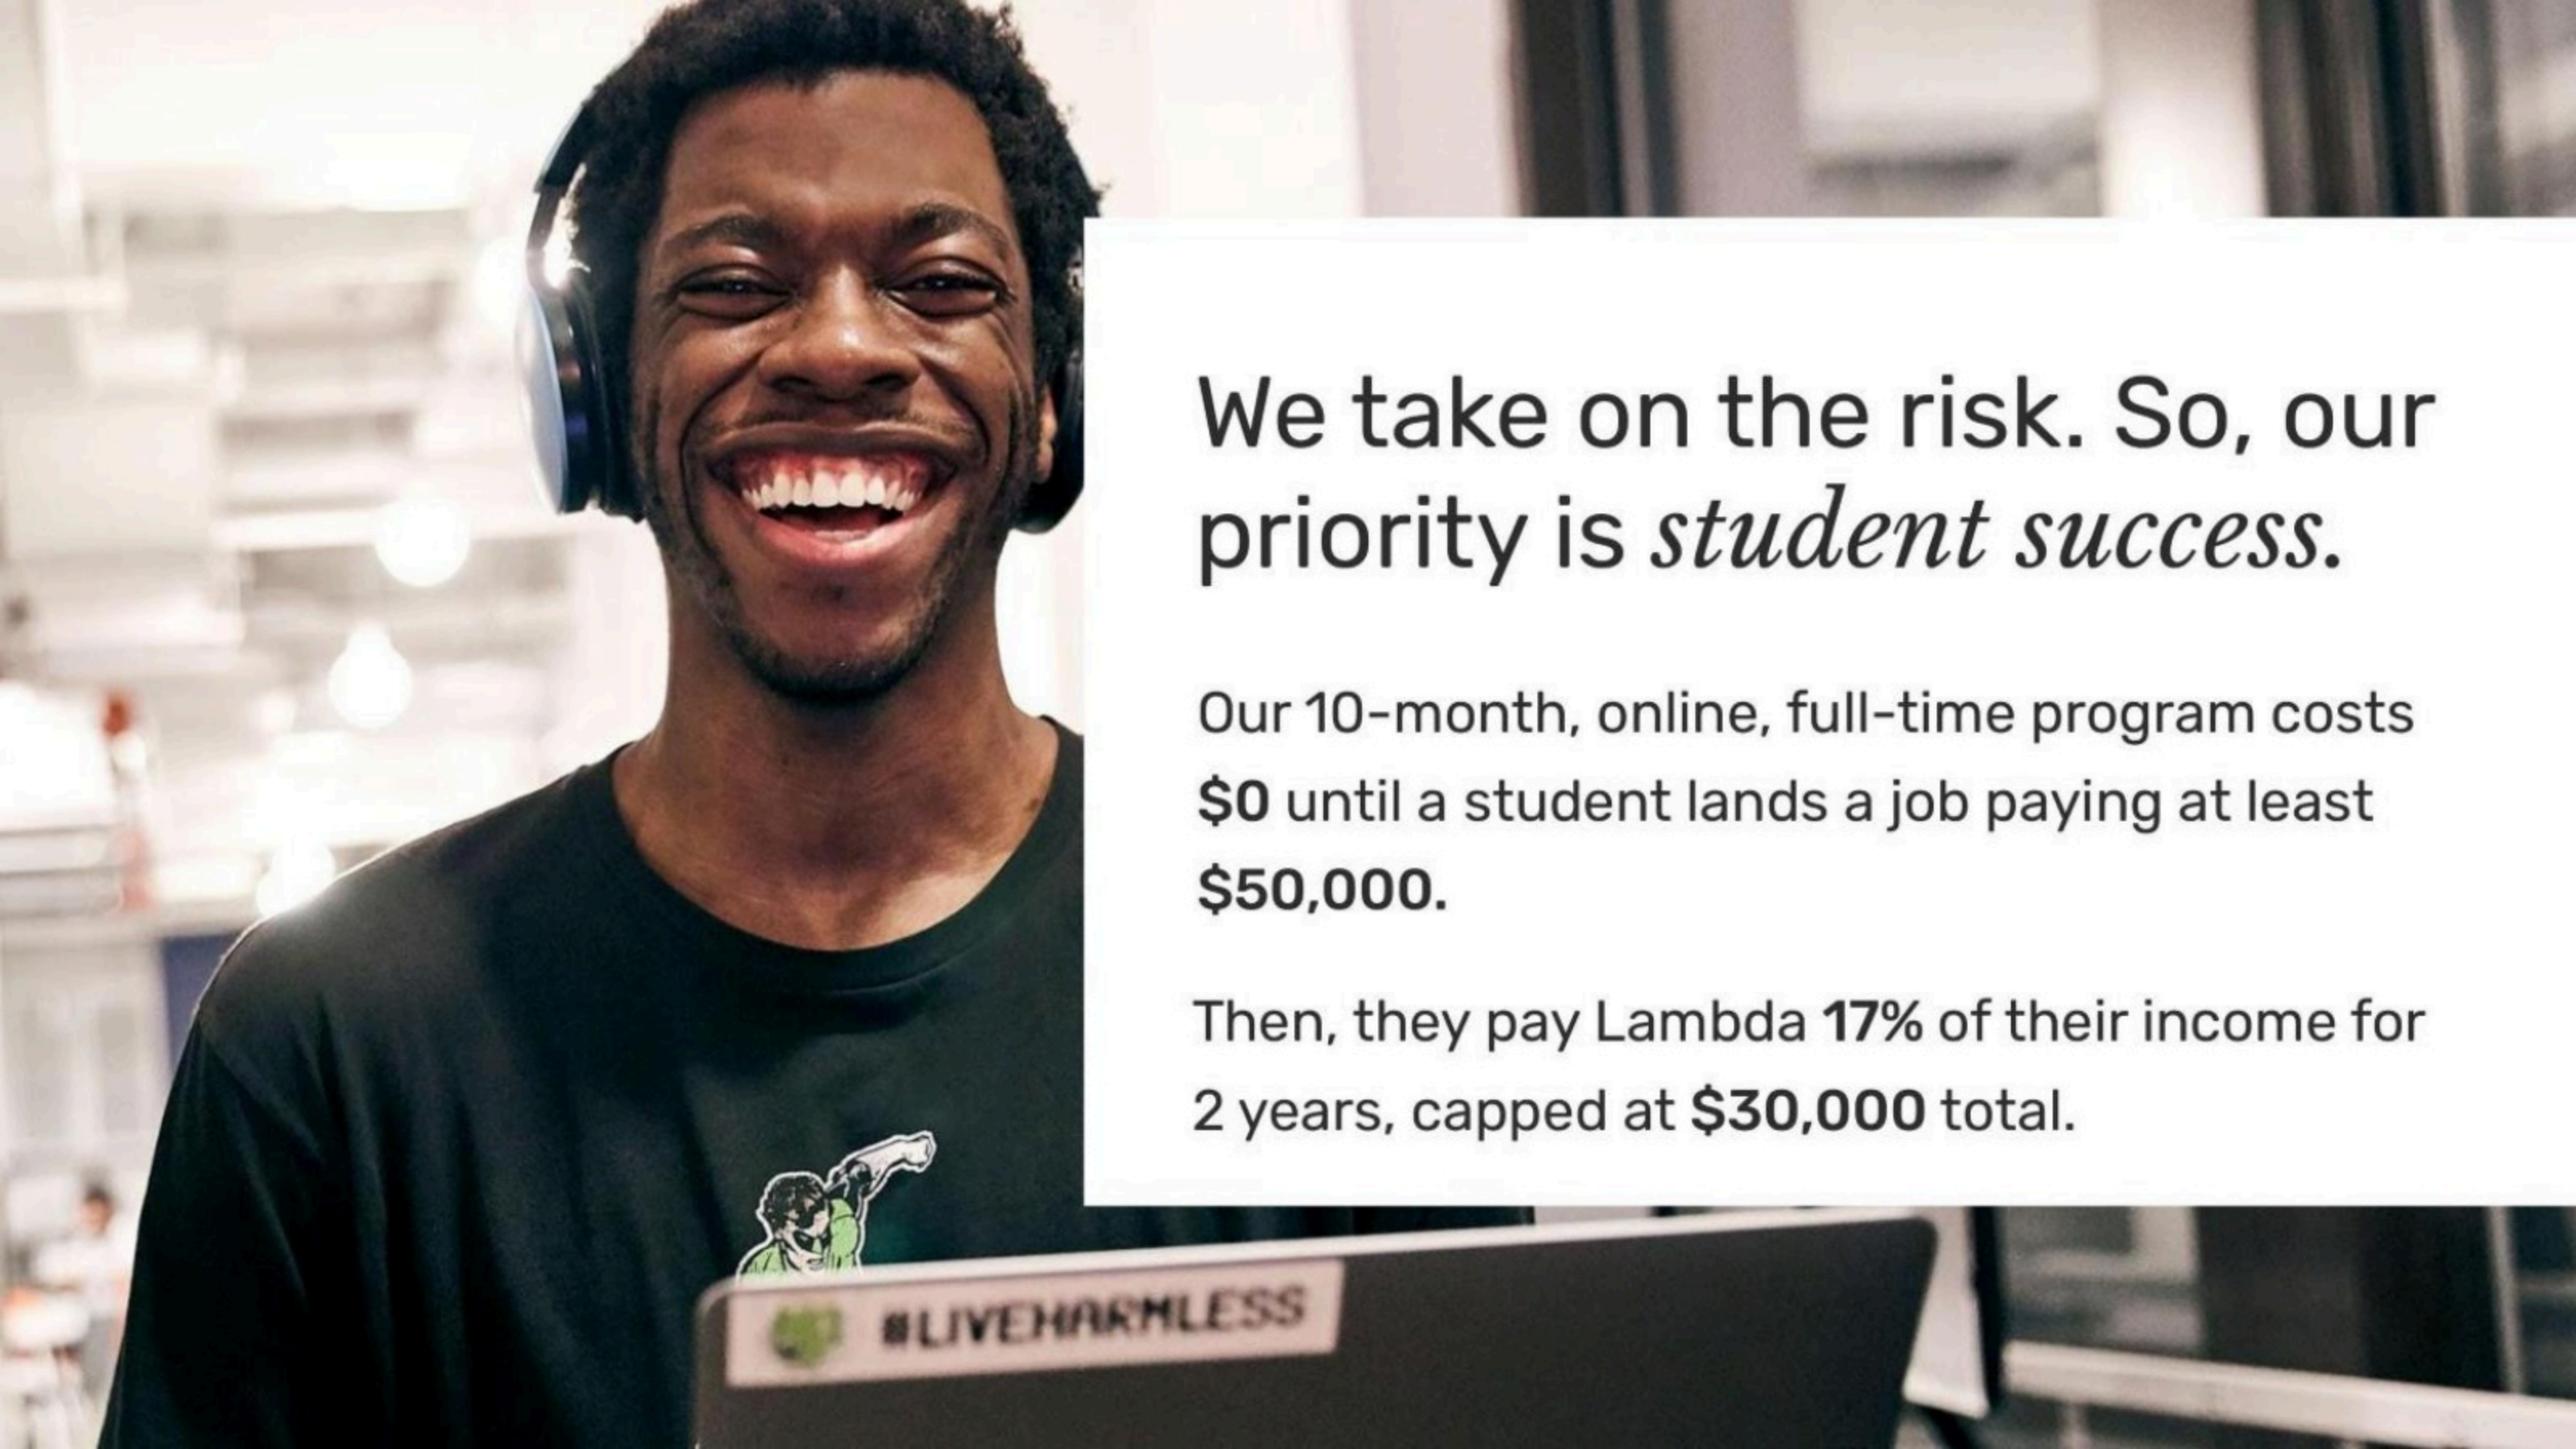
Lambda



We invest in *human potential*

Lambda School trains people for high-paying careers at no upfront cost, in exchange for a percentage of their future income.



We take on the risk. So, our priority is *student success.*

Our 10-month, online, full-time program costs **$0** until a student lands a job paying at least **$50,000.**

Then, they pay Lambda **17%** of their income for 2 years, capped at **$30,000** total.

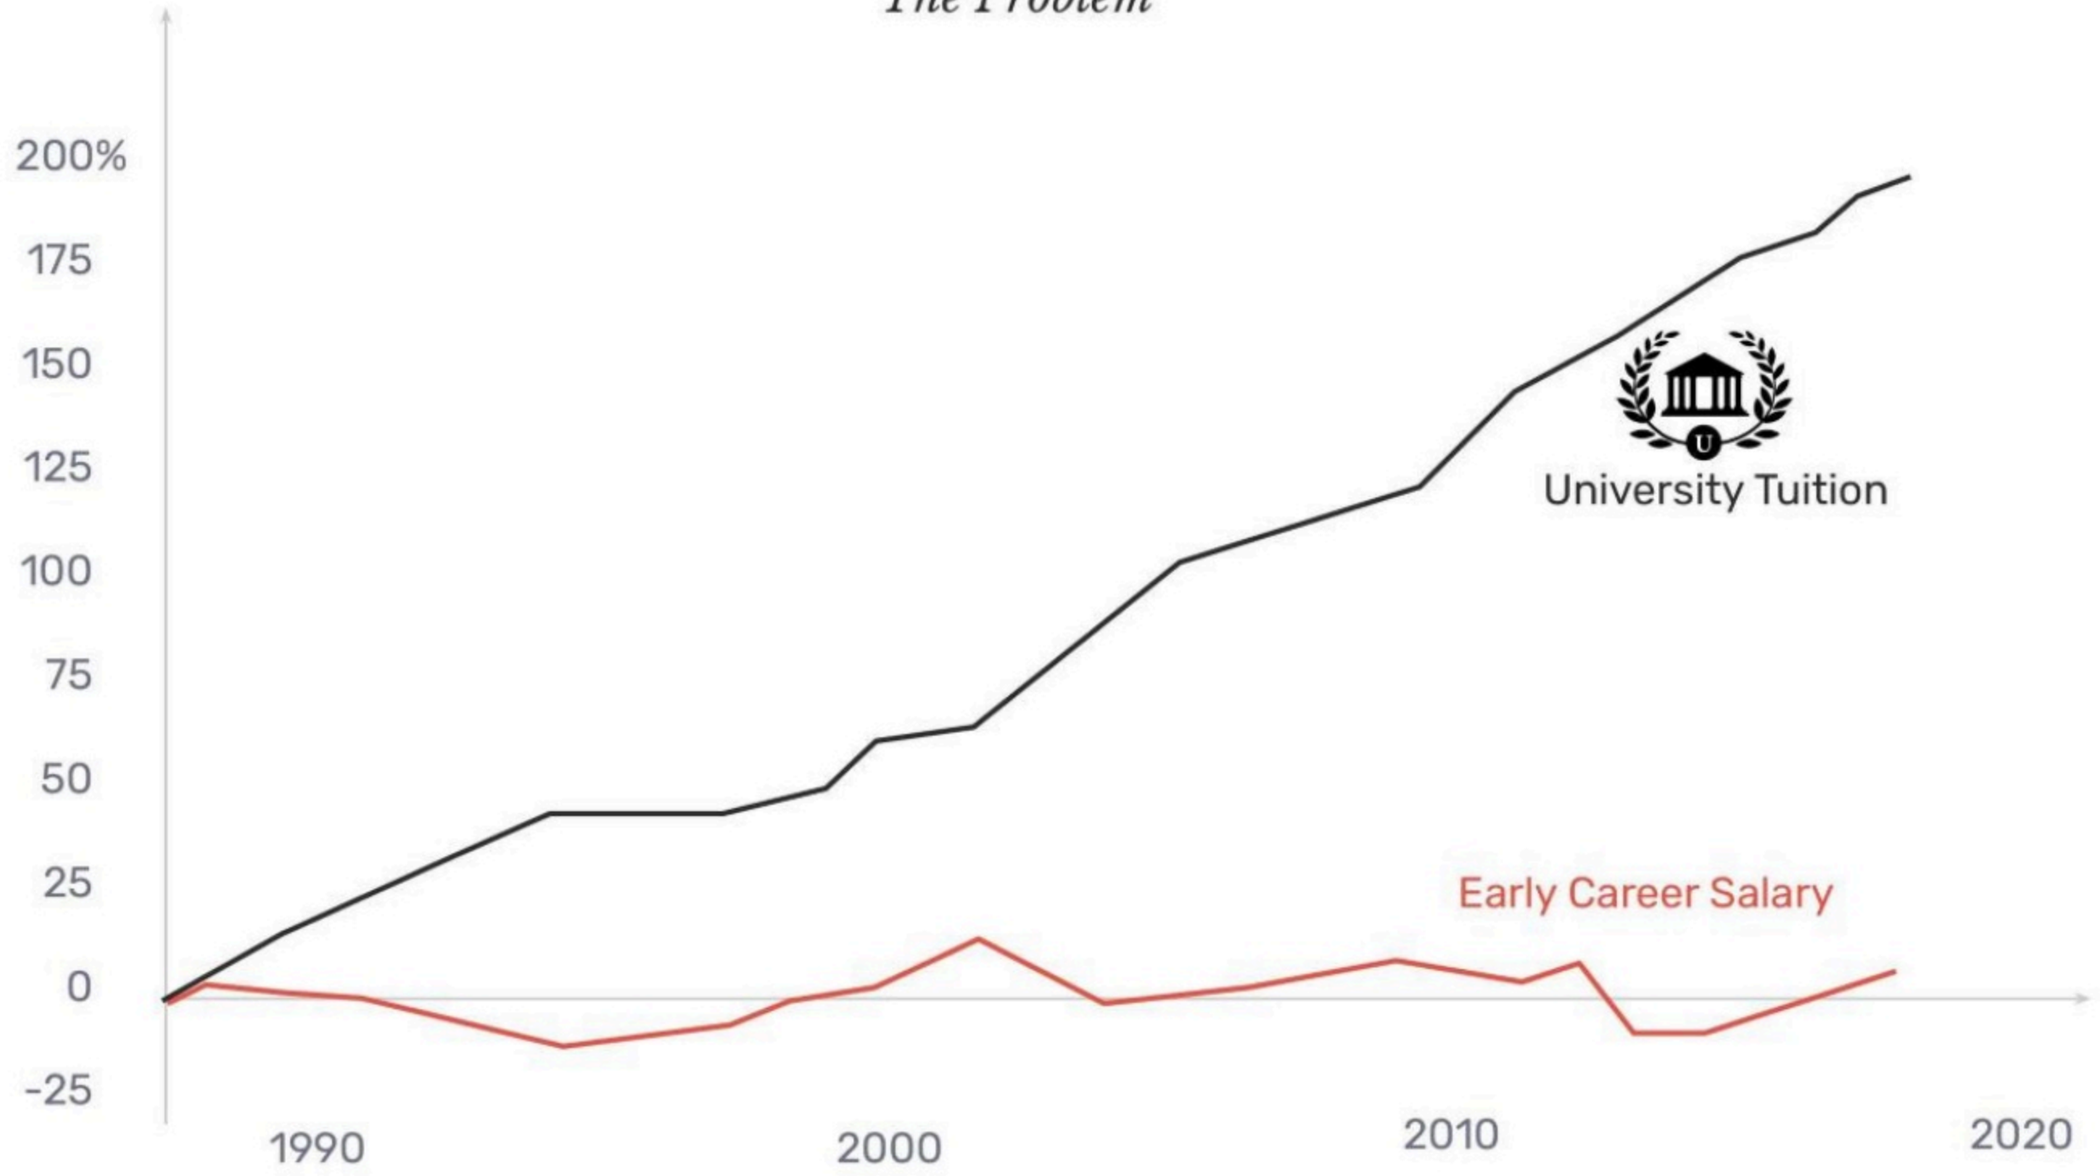
The Problem

Higher education is broken.
Universities are expensive, risky,
time consuming, and ineffective.

The Problem



% change since 1987, adjusted for inflation. Source: National Center for Education Statistics, National Association of Colleges and Employers, US Department of Labor

The Solution

Lambda School identifies people with high potential and helps them get high paying jobs.

The Solution

Lambda School identifies people with high potential and helps them get high paying jobs.
