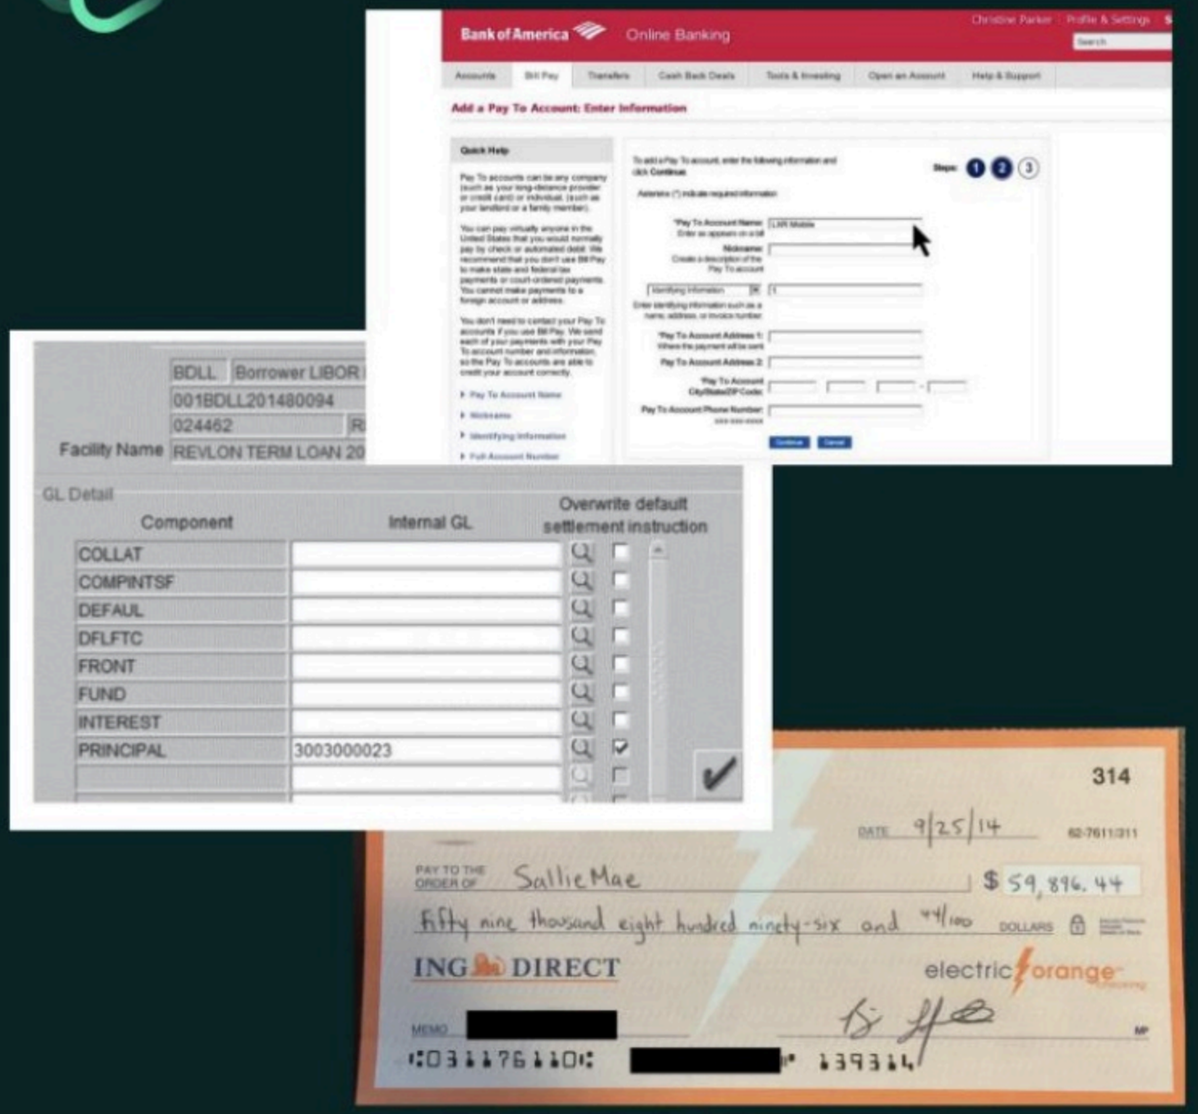
method

Embedded debt repayment API

99% of Americans make **debt repayments** using **archaic** methods



Current Situation

Over 10k different lenders in US

Integrations built on brittle systems with manual processes (e.g. mailing checks)

Incumbents are costly and unsecure

Limited to outdated non-developer friendly API integrations

6 month integration timeline

Custom banking compliance integration required

Holistic financial management is taking off and **debt repayment rails don’t exist**

Method's Rails

95% of lenders supported

Make payments to any type of consumer debt

Developer friendly API

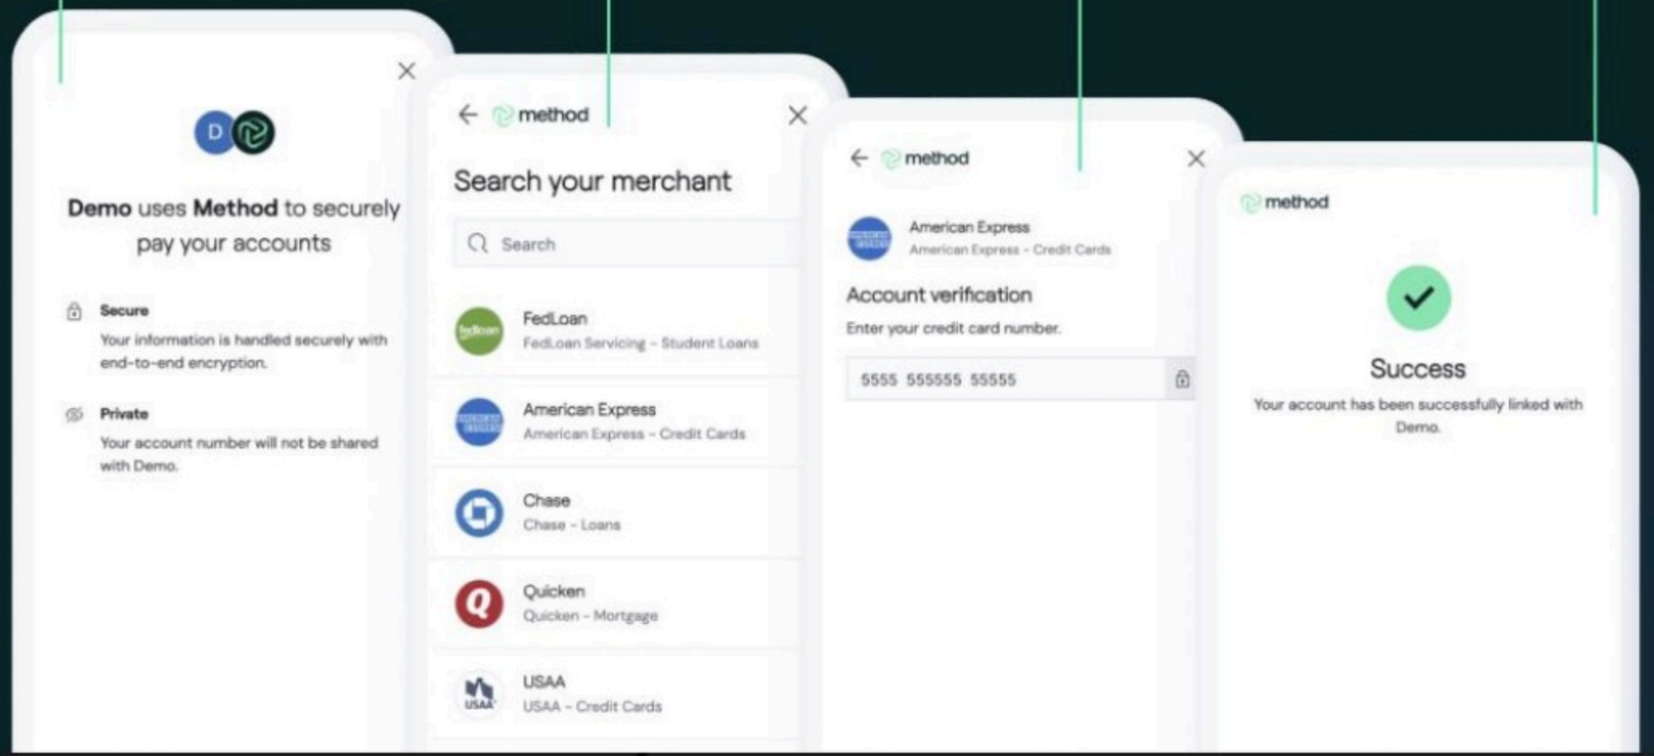
Secure and compliant embeddable UI components included

Start moving money instantly

All you need is a Method API key

How It Works

1. **Launch Method**
   Embed Method or build your own UI.
2. **Complete Coverage**
   Link any type of consumer debt. No credentials required.
3. **Instant Verification**
   Real-time verification of account info with lender.
4. **Continuous Access**
   Persistent payment access without re-authentication.



Current Solutions
