APPLICATION SECURITY, FROM BUILD TO COMPLIANCE

THE PROBLEM

Organizations using modern development techniques have vulnerable applications & APIs

Current solutions are:

Flawed by design

Security focused & not Dev focused

Huge global shortage of security professionals

Difficult to manage & Wrat with false positives

Technically limited

Unable to test APIs & multiple protocols

Lacking ability to scan authenticated sites & SPAs

No effective CI/CD integration

MACRO TRENDS PROVIDING STRONG TAILWINDS

2020 is the inflection year where >50% of development organizations will adopt CI/CD practices

Huge shortage in security professionals

Manual pen-testing & SAST are becoming less desirable due to high cost, complexity & speed
