Substance Use Disorders affect 10% of the population and is the largest unmanaged disease in modern healthcare

10% (21M) of employees and dependents have a Substance Use Disorder

Only 10% receive treatment due to cost, access, stigma and lack of education

<30% success rate from retail rehab while more effective evidence based treatment remain under utilized

Treating addiction **costs society \$740 Billion annually**

A woman with dark hair and glasses is shown in a close-up, looking down with a distressed expression. Her right hand is raised to her forehead, suggesting stress or pain. She is wearing a dark green top. The background is blurred, showing what appears to be an indoor setting with plants and furniture.

**Treating Mental Health
means treating SUD**

33% of employer mental health
issues are Substance Use Disorders

The SUD patient experience is broken...

Access: 2 to 3 week wait times

Network: Often no options to see addiction board-certified providers

Guidance: Patients often receive unnecessarily intense levels of care or no care at all

Follow-through: Often treatment stops after 30 days when a long term approach is needed

... resulting in **high relapse rates, out of network utilization, and ballooning healthcare costs**

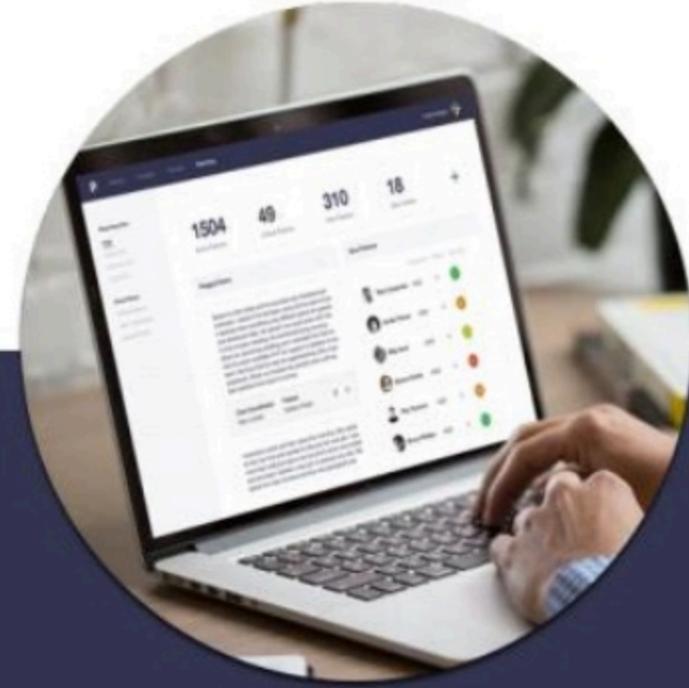

PATH

Care Coordination

**Addiction Certified
Provider Network**

Outcomes Reporting

Path guides patients to the right provider network and reports on outcomes

Care Coordination

Patient Intercept

Interception captures employees and dependents to guide treatment decisions.

ASAM-PPC Assessment

ASAM guided patient assessment to ensure correct level of care is applied.

Outbound & Personalized

Patients receive dedicated care coordinator that provides proactive coordination.

SUD Provider Network

Addiction Certified

Provider network composed of addiction board certified providers.

Quality Checks

Robust vetting process to ensure providers meet clinical standards.

Immediate Access

Patient is seen by provider within 48 hours of intake and assessment process.

Outcomes Reporting

Longitudinal Data

Data collected starting from interception throughout the entire continuum of care.

Comprehensive Reporting

Treatment data collected from providers, patients, coaches and care coordinators.

Critical Event Monitoring

Measurement of critical events and high levels of care use compared to baseline.

With Path, patients start treatment with the right provider in less than 48 hours
