Presentations remain a **major opportunity**

It takes **too many tools** to create and distribute presentations

Create

 Unsplash

 Dropbox

Collaborate

Present + record + share

 zoom

 loom

 DocSend

Publish

 YouTube

The first complete presentation platform

Uncompromisingly good presentation software.
Purpose-built for teams.

Designed for everyone, built for teams

Apps across devices

Apps for macOS, Windows, and web help teams work offline, online, and on the go.

Built for the modern world

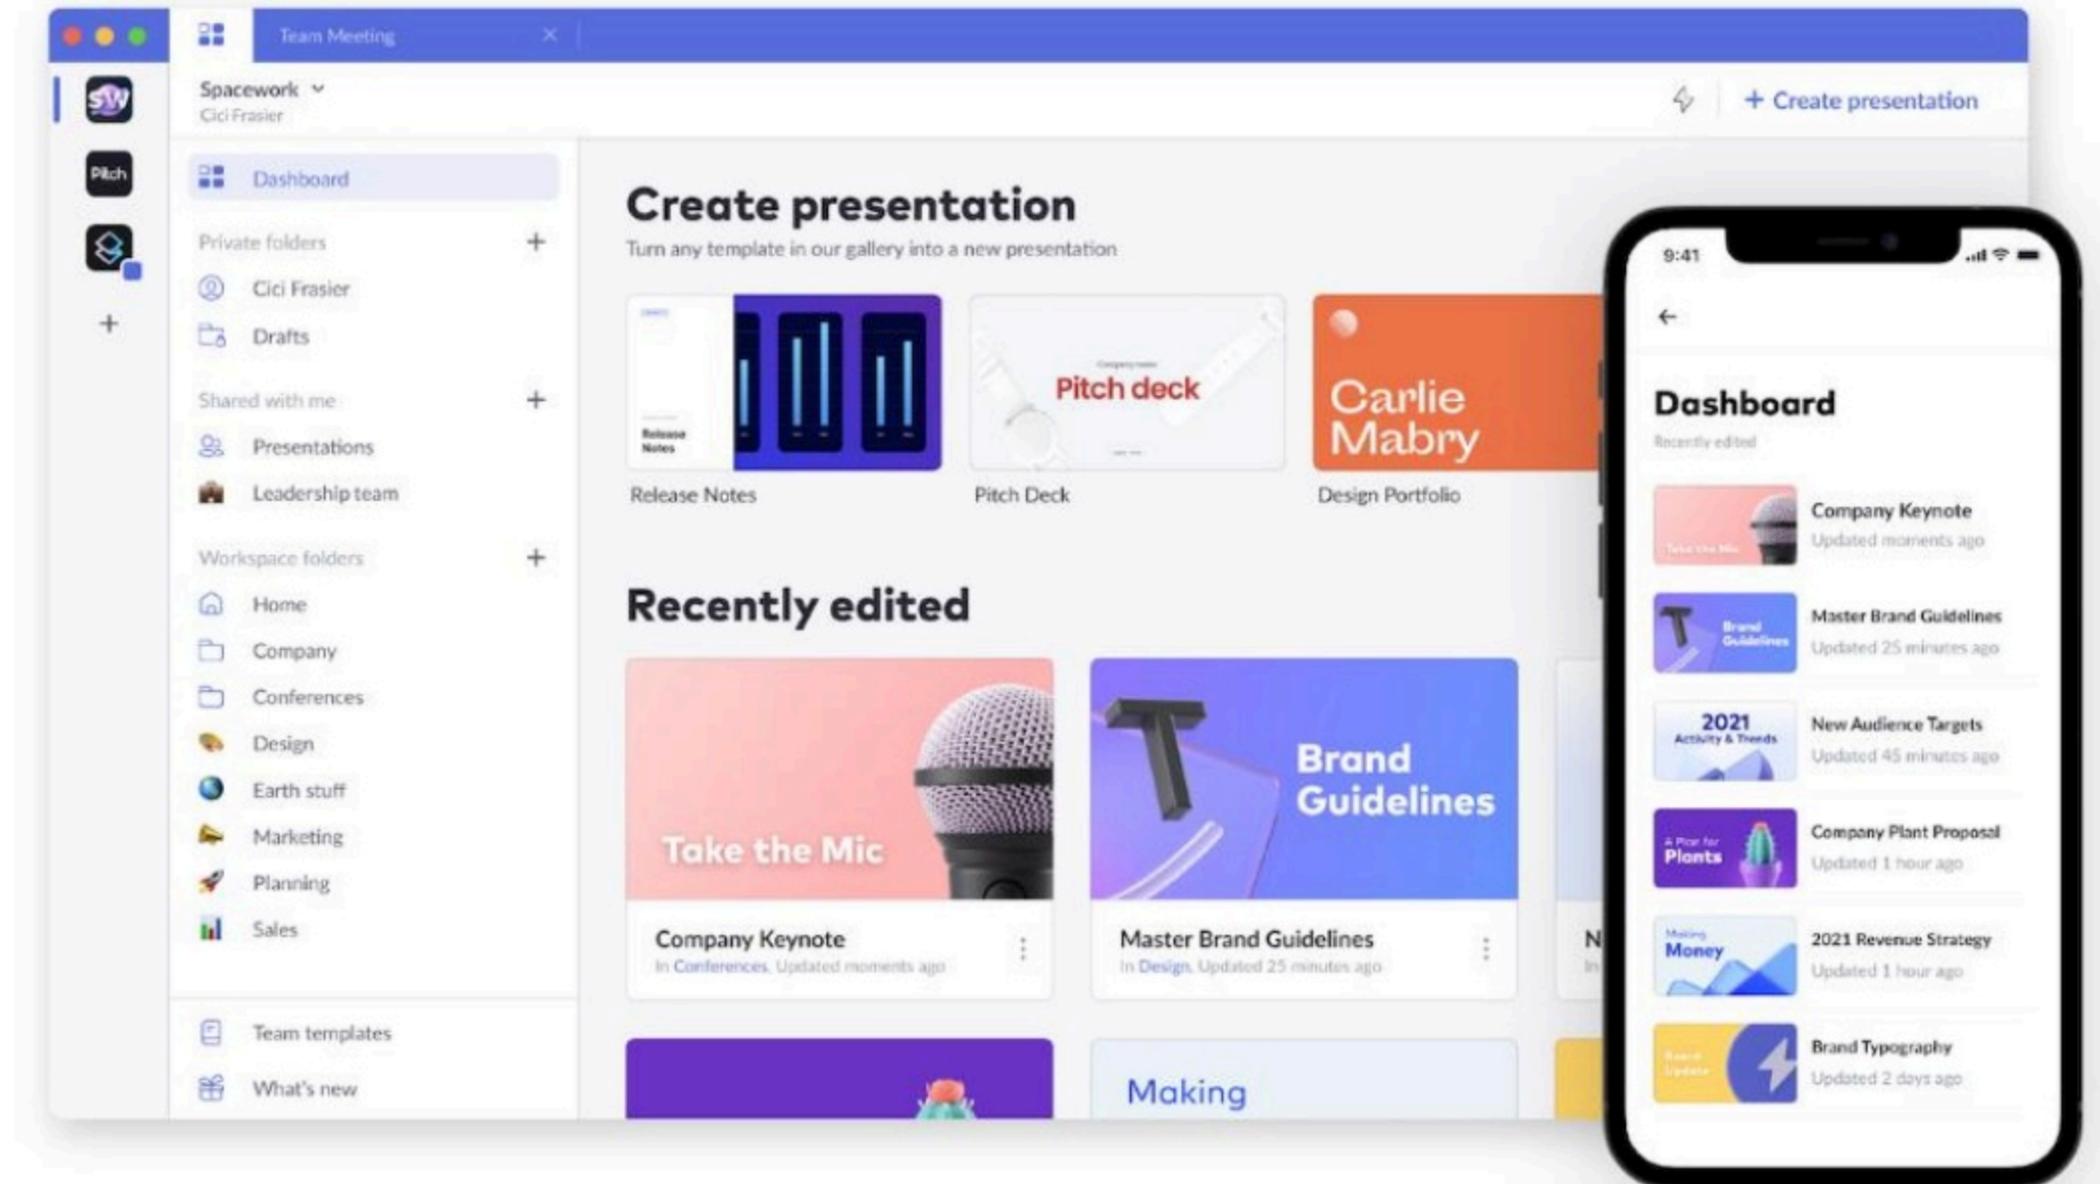

Work and notifications are centralized, discoverable, trackable, and fit just right in any remote playbook.

Brand assets bundled in

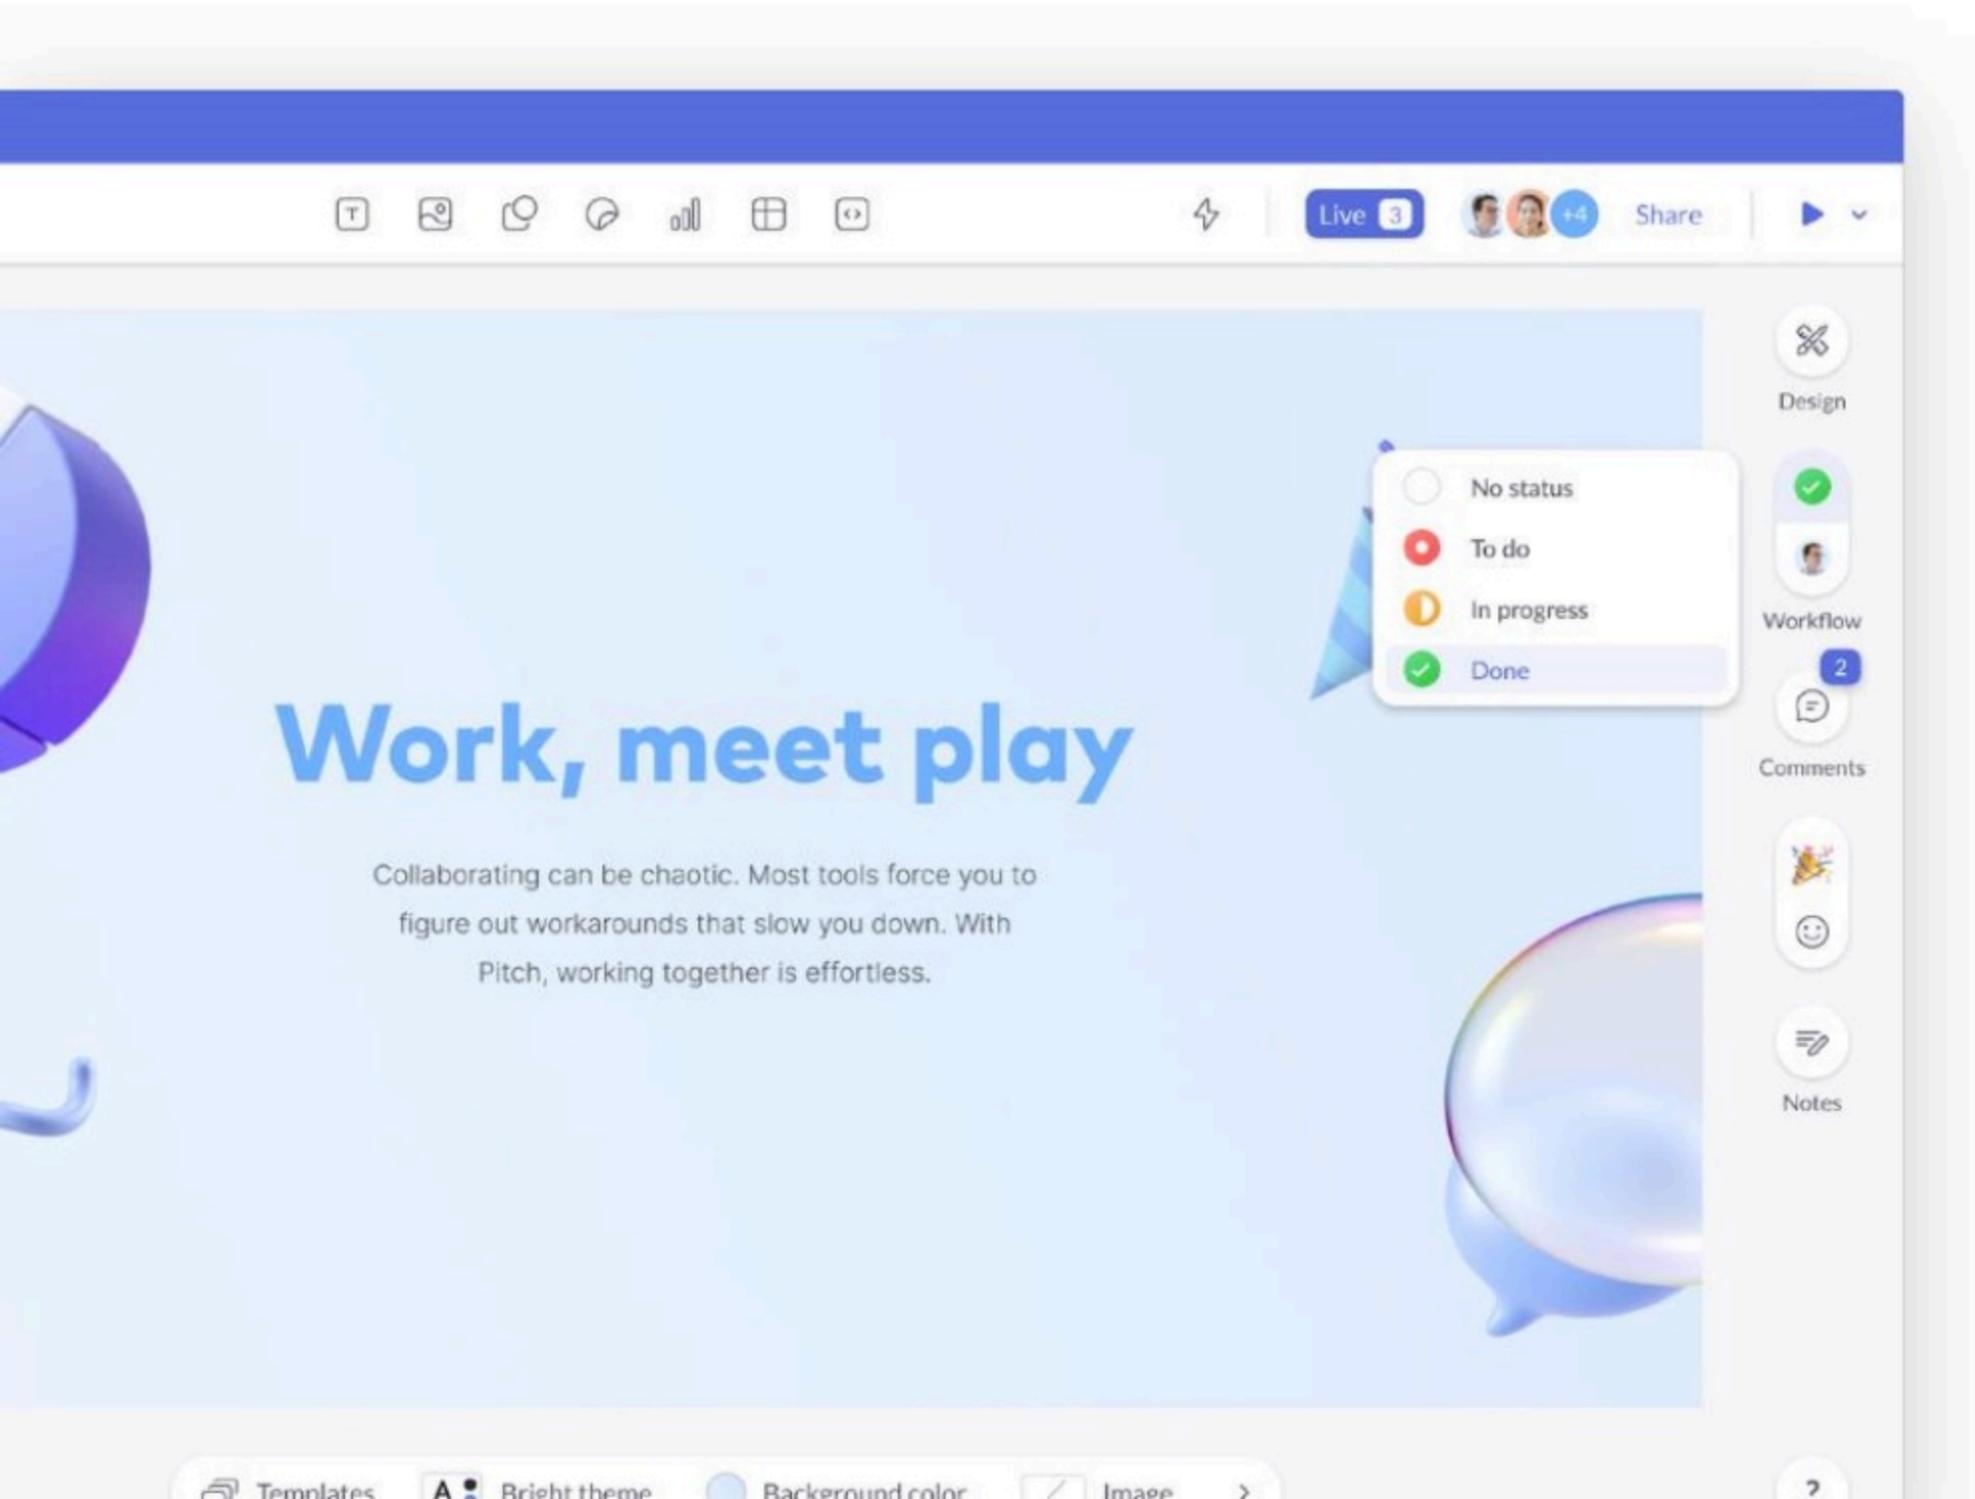

Templates, fonts, and more stored and available for the whole team.

Modern, delightful UX

Focus is placed on creating high-quality presentations faster than ever.

Create and collaborate in real-time

Real-time collaboration for all

Teams and guests can work together across any device following each other in real-time.

Sync over live video

Built-in video sessions help teams connect face to face from anywhere.

Powerful team workflows

Slide assignments and statuses keep work moving forward.

Intelligent notifications

Email, mobile, and desktop notifications help teammates stay in the loop on important updates.

Create stunning, on-brand presentations, **blazingly fast**

Professional templates for every need

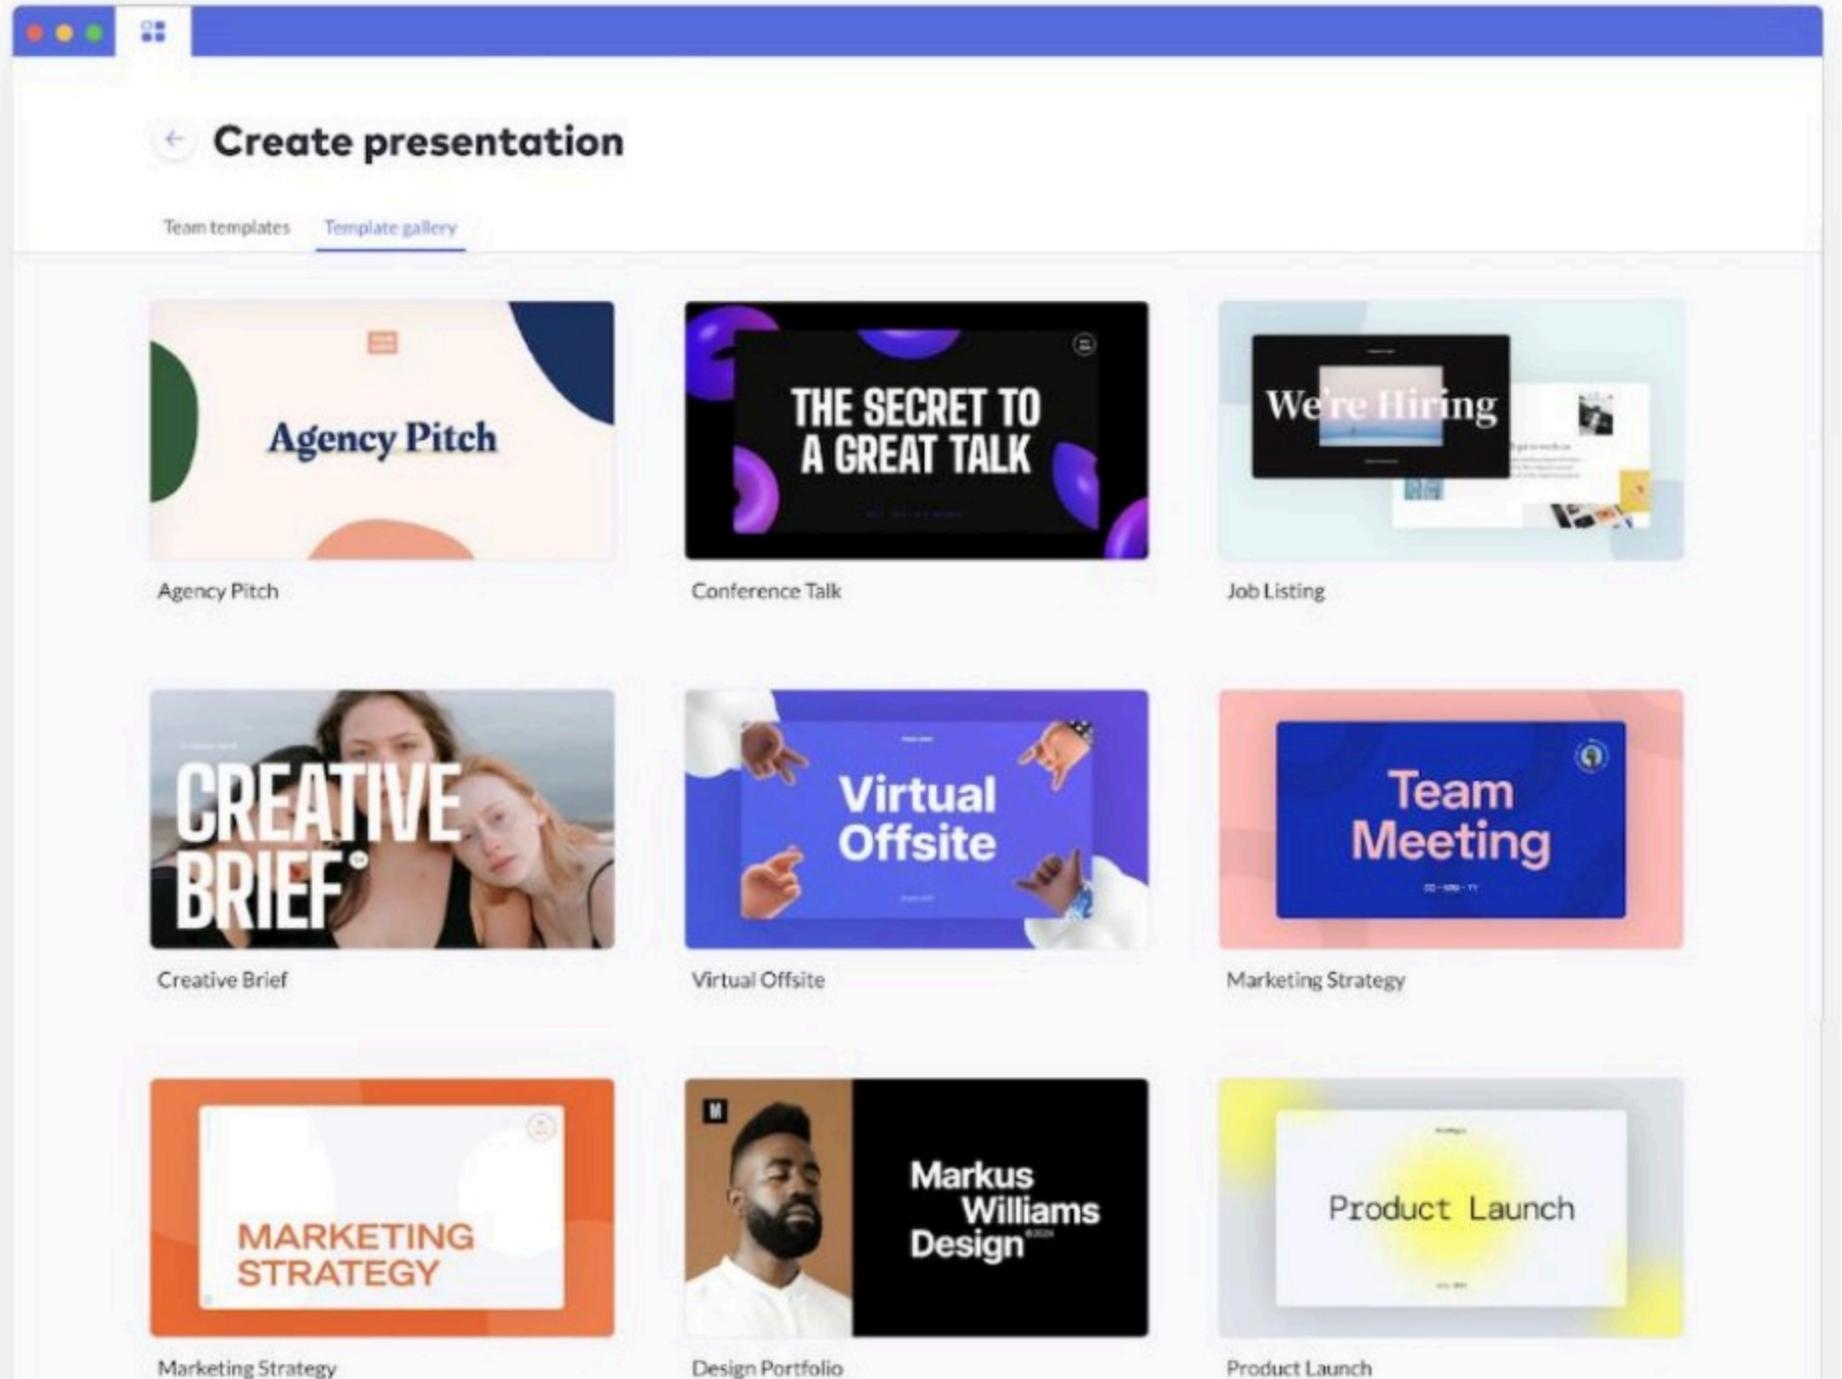

Gallery of custom-crafted templates guide story and design, saving hours.

Tailor-made team templates

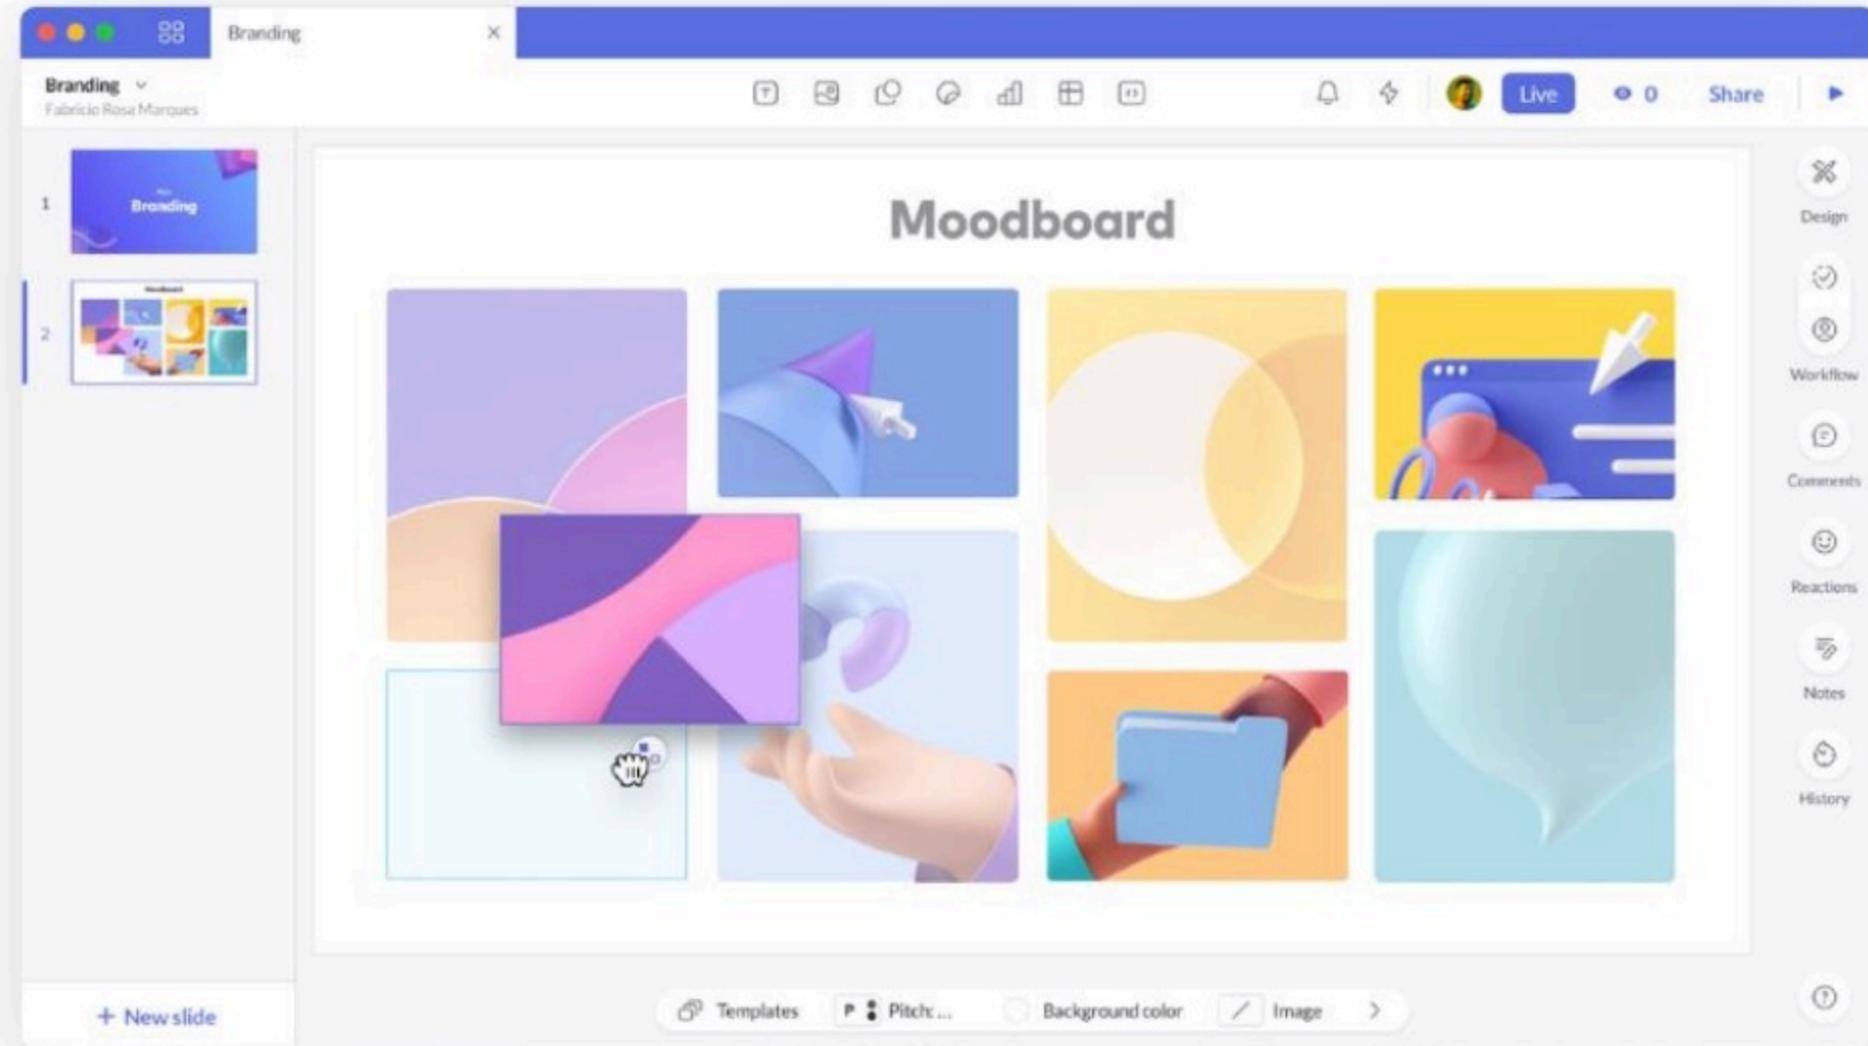

With just a few details, Pitch can automatically generate a company's first custom style.

Import and export

Migrating work into Pitch from PowerPoint or other major tools is simple, and any presentation can be exported as a PDF.

Edit slides like a pro

Move fast with the quick menu

Add and position content with powerful keyboard commands.

Save time with swapping

Swap the order of text, images, and more without the help of a designer.

Wrap text automatically

Write without worrying about overlapping text; content on the slide will adjust automatically.

Keep slides tidy

Smart tidying quickly aligns and distributes selected blocks, avoiding the tedium of pixel-by-pixel adjustments.

Time travel, step by step

Granular history for every block

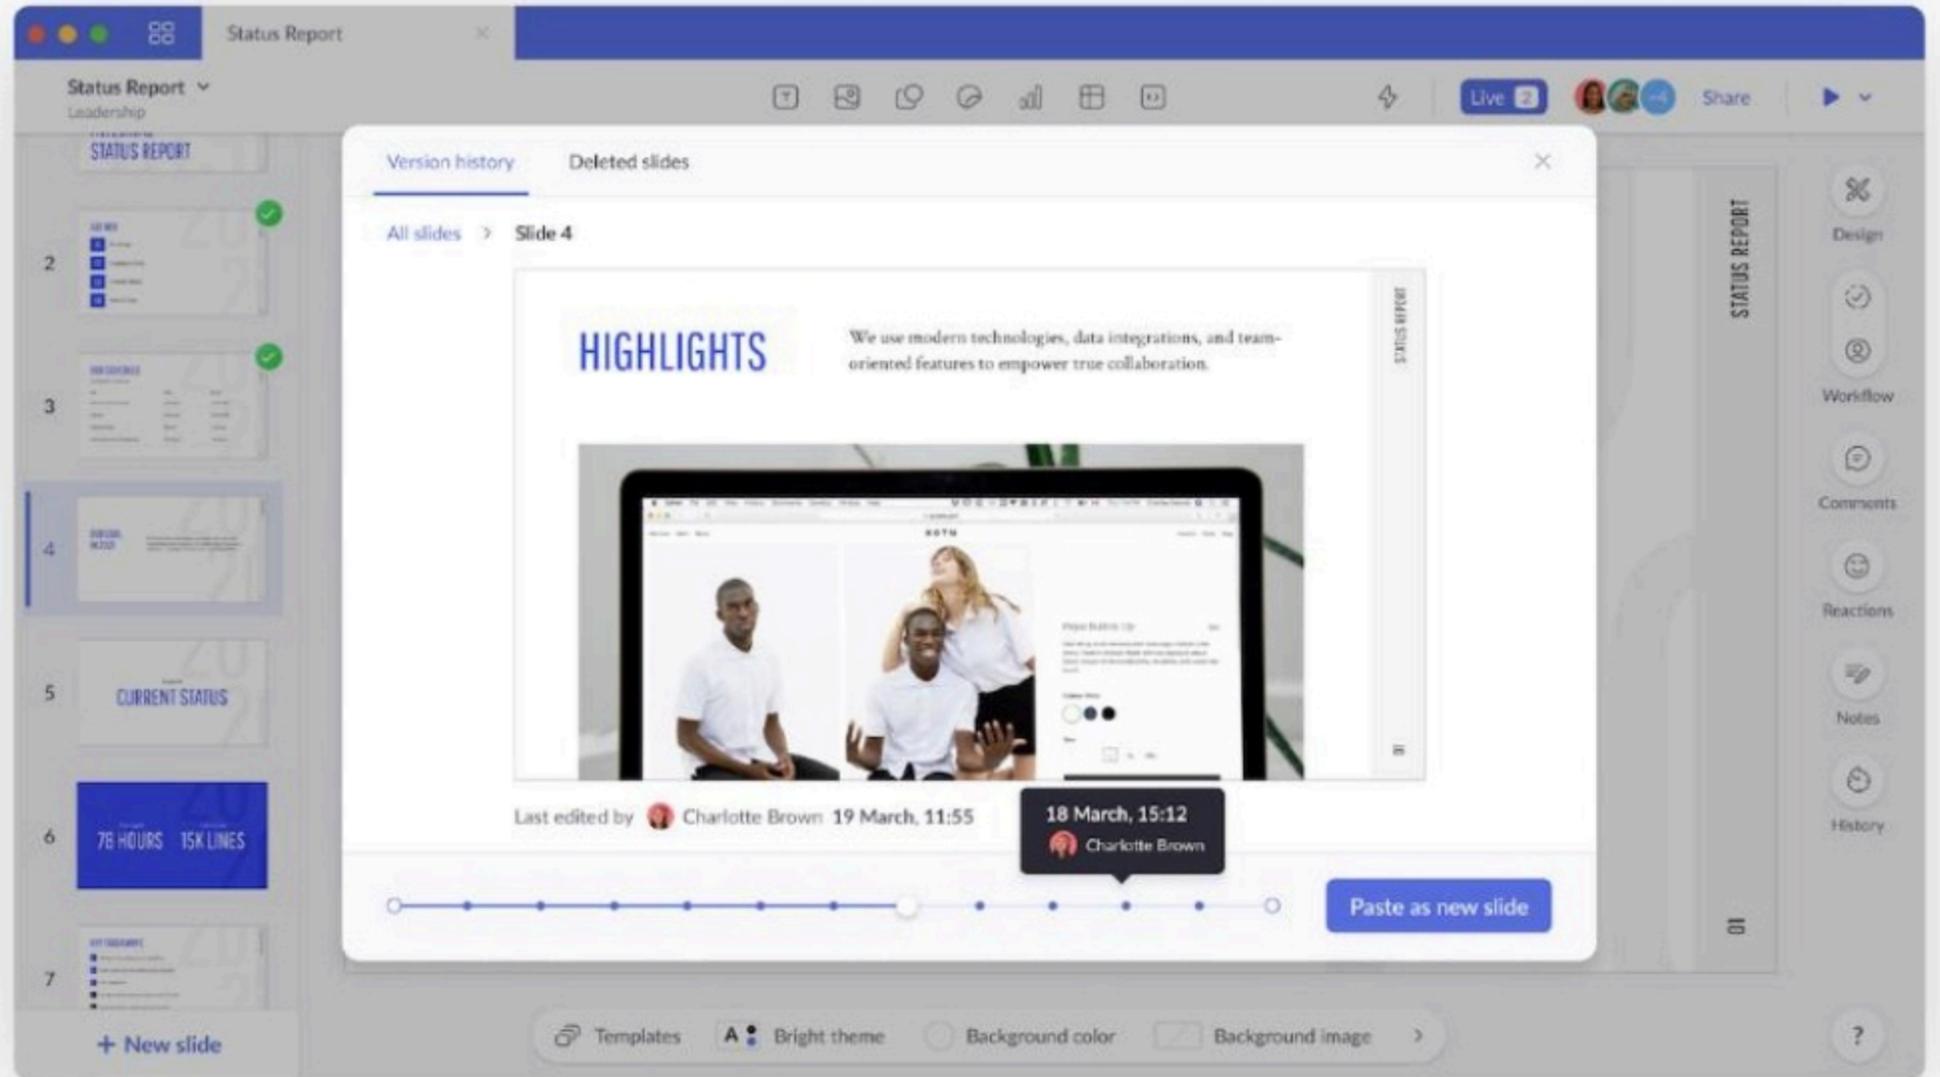

Changes are tracked on a per-element, per-user level, making it easy to see how changes were made.

Intelligent versioning

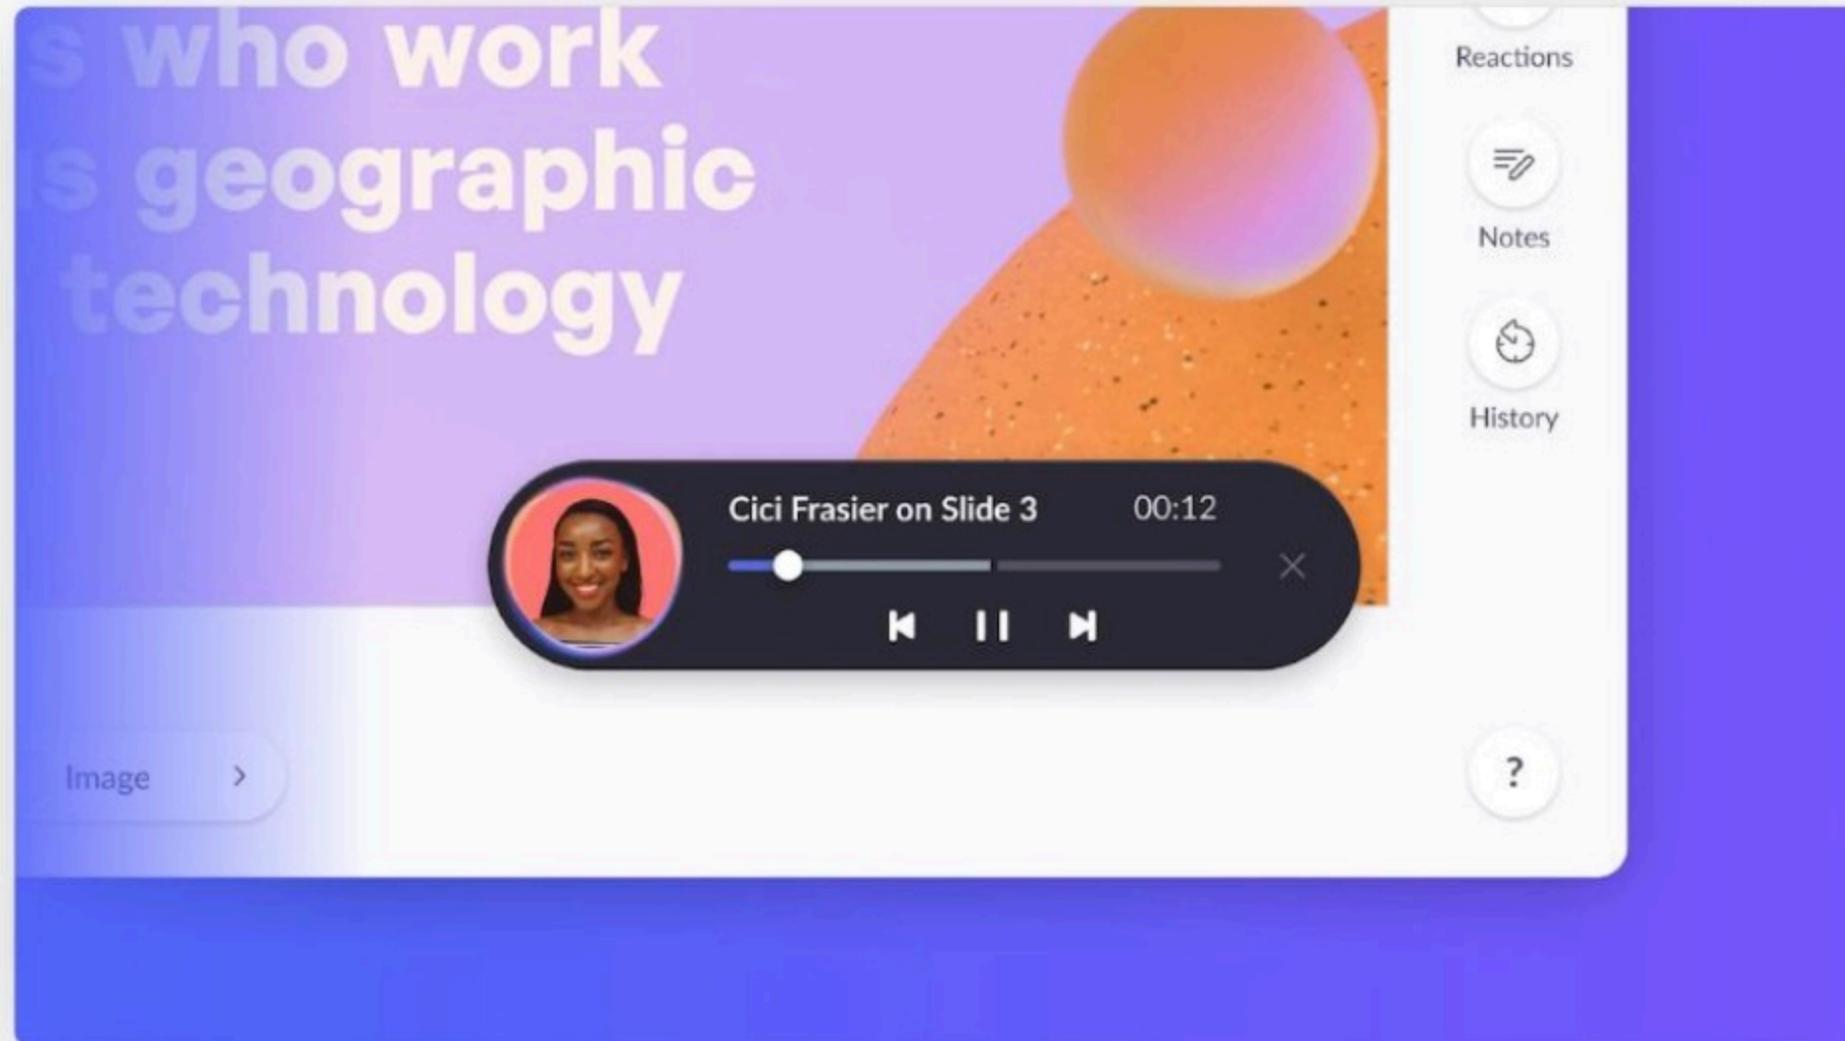

Go back in time for each element on the canvas individually, up to the point of its creation, or for the entire presentation.

Total accountability

Every change can be traced back to its creator.

Tell your story, together

Share links instead of your screen

Pitch links show updates and presenters, helping teams cut out clunky conference tools and low-res screen shares.

Present together: collaborative remote control

Collaborative remote control helps teams pass the mic while presenting and avoid the dreaded phrase, "Next slide, please."

Turn presentations into narratives

Shareable recordings capture every presenter, bringing multi-dimensional storytelling to life.

Build and grow your audience

Inherently shareable

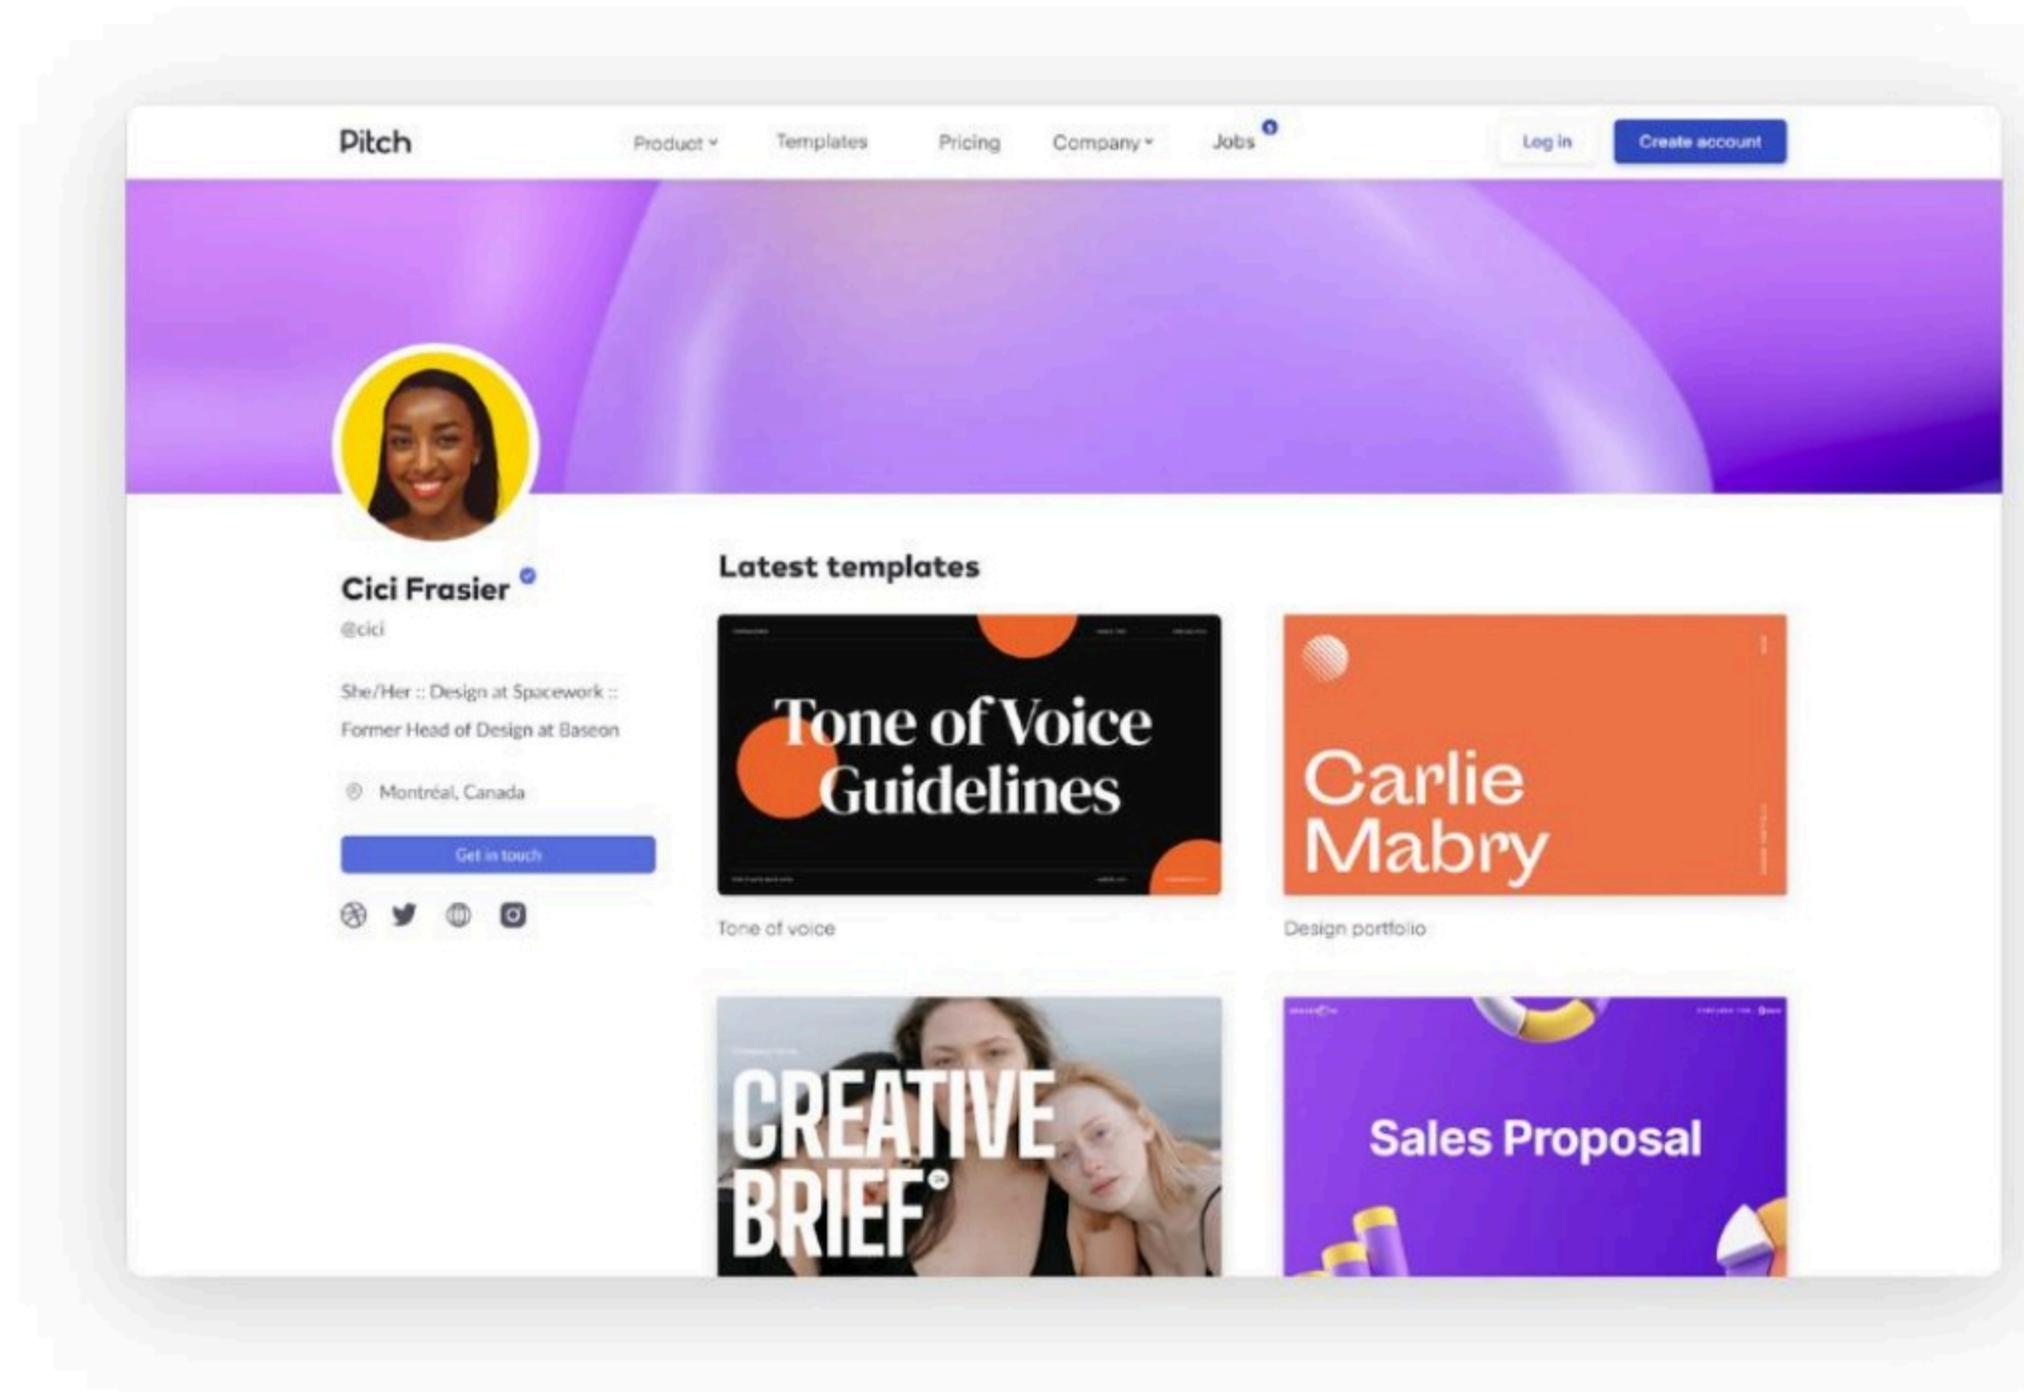

Publish presentations and share them with the world. Legacy platforms like SlideShare reach >100M monthly visitors.

Discover the best ideas

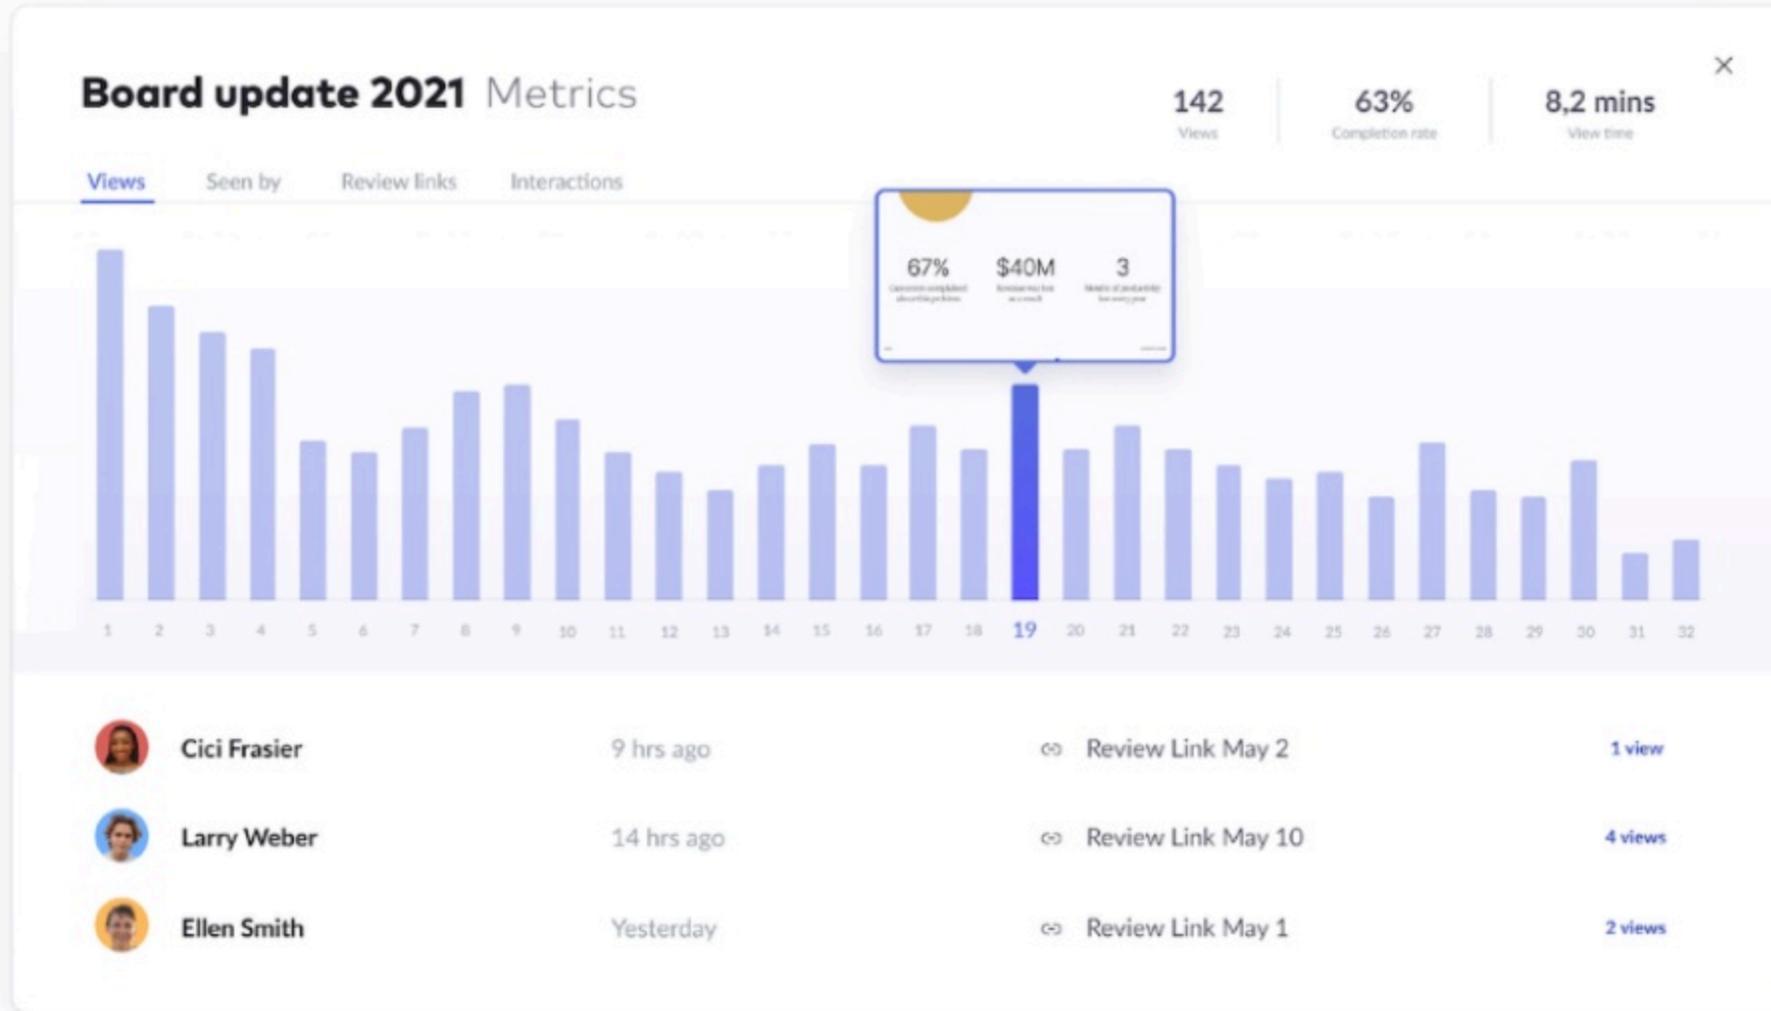

Partnerships with top thinkers and leaders for great content that viewers can discover, search, interact, and share.

Build an identity

With public pages, creators can build a dedicated home for their standout work, and gain followers, engage audiences, and nurture their own communities of interest.

Gain actionable insights with **built-in analytics**

See who's watching and what they care about

Detailed behavior analytics will give entrepreneurs and sales teams valuable insights into how audiences engage with their decks.

See what's working with content insights

Instead of using DocSend, creators can get immediate insight into content performance and incorporate learnings right away.

**Made for everyone,
built for teams**

Used and loved by teams everywhere
