

Renewables on the Rise

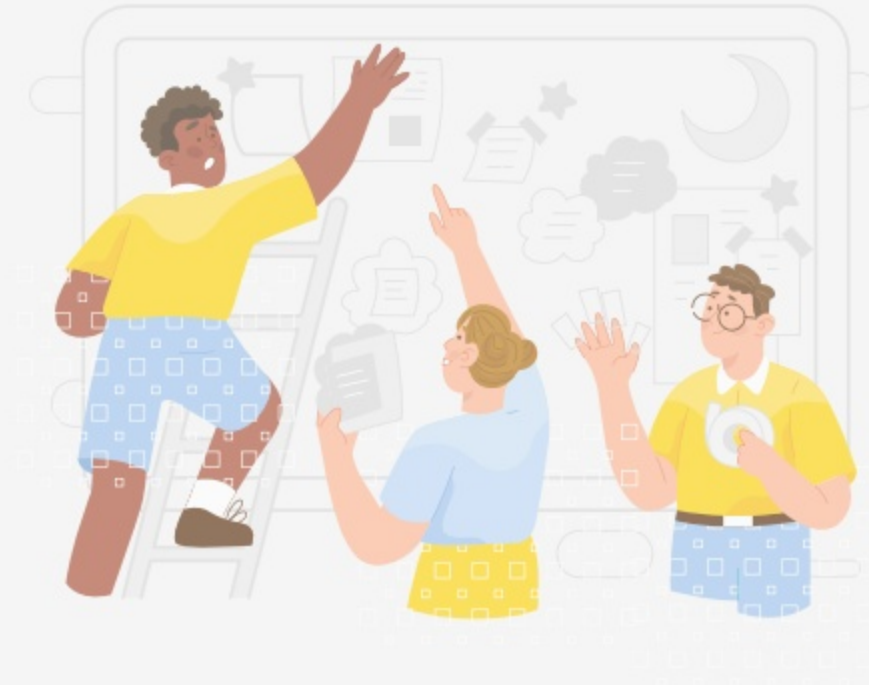

Fueled by *Government Support*
and *Decarbonization Goals*

Up to **857 GW** by 2029

Projected **4x** PV Installations Growth
2022-2029

The Industry Struggles to keep up

Slow manual process

Inaccurate, not fit for construction designs

Fragmented industry, not possible to use the same software for the entire lifecycle

Projects are built differently in different offices/regions

Poor customer service

The PVcase Way

Reducing design time by **30X** times compared to doing it manually

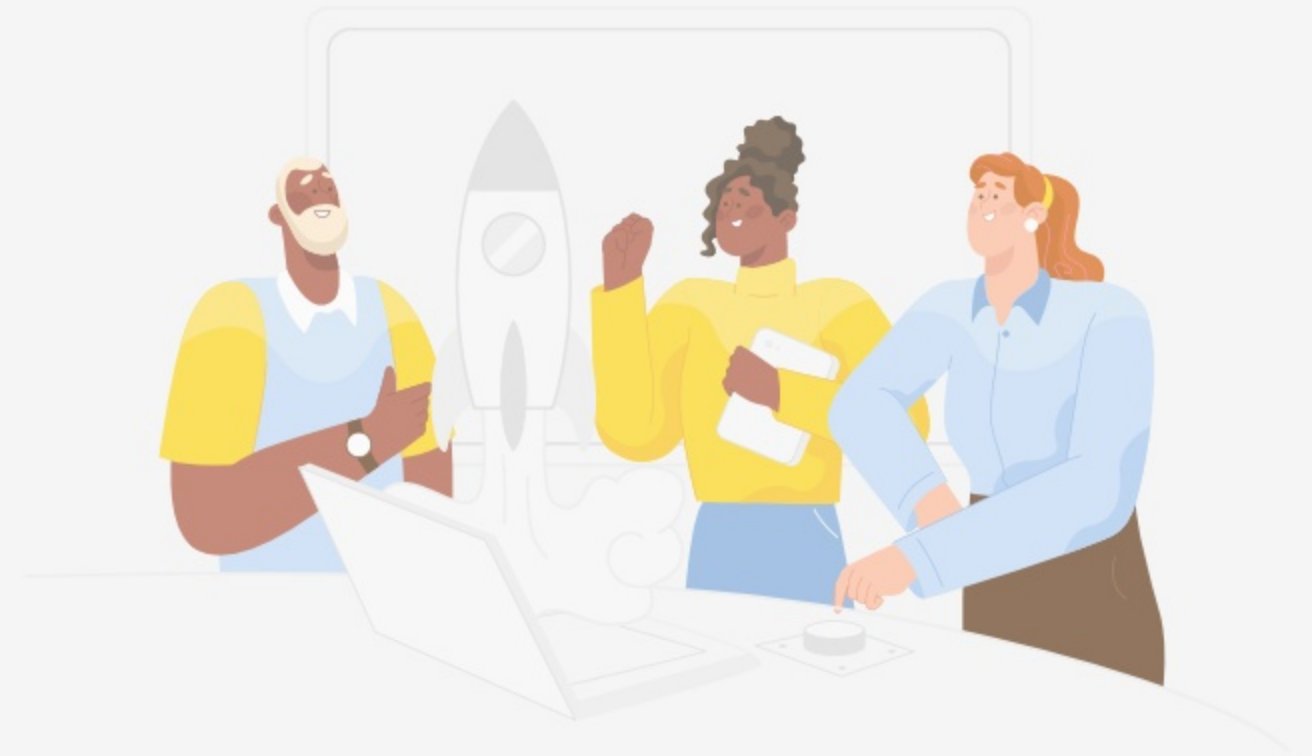

Drives design standards & consistency across regional offices

Best in-class customer service

Well positioned to meet other software needs in early design & post-construction stages

- 30x faster designs
- 11% increase in capacity
- 9% more precise cable lengths
- 13% increase in energy production
- Operating in over 60 countries

Customer reference – GM

Lasse Nieswitz
Team Lead Design Engineering

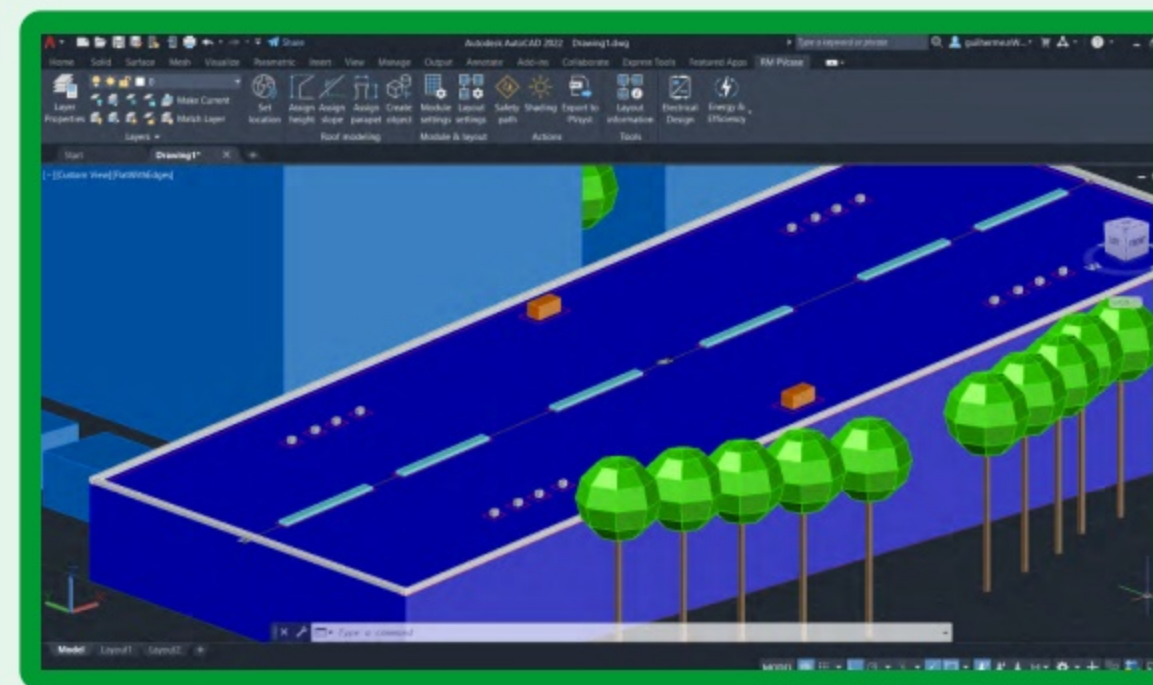

“PVcase saves so much time in adapting designs. The best part about it is I can train a student just starting in the industry to use PVcase perfectly within two weeks on the job. The simple interface makes it so easy”.

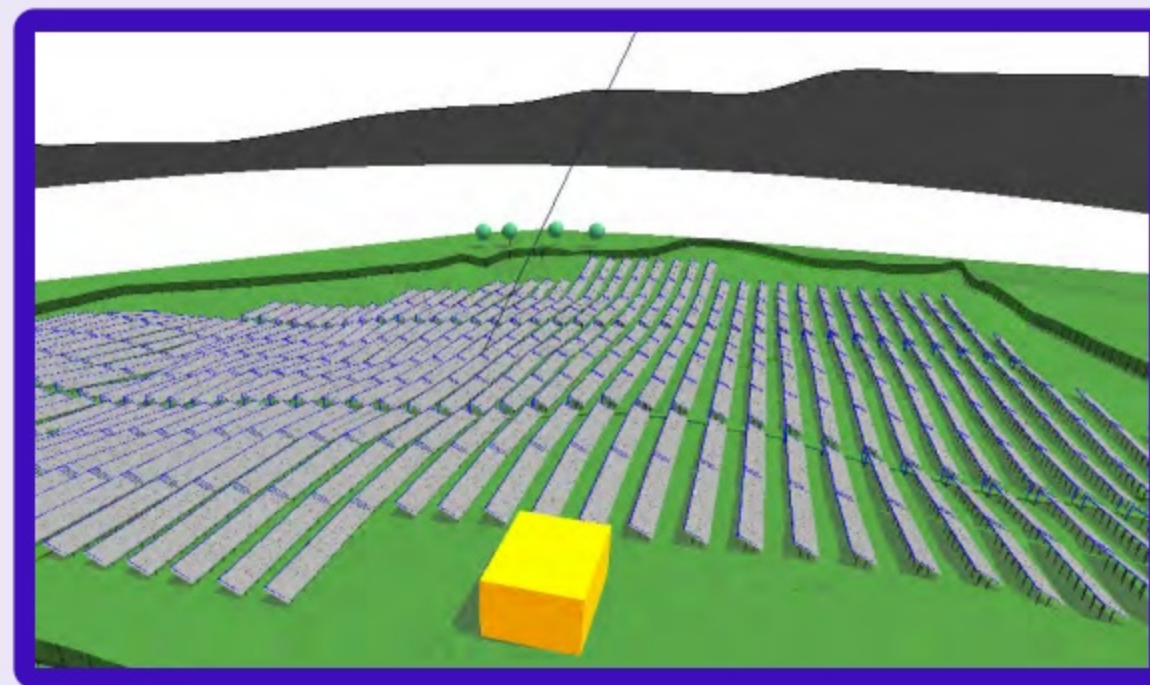

- Faster and more precise rooftop system modelling
- Automatic layout generation
- Rapid 3D building preparation
- Accurate shade loss modelling
- Adapt models quickly to flat or sloped roofs
- Automated and Semi-Automated stringing

- Over 10 years of R&D experience
- Convenient, cloud-based user interface
- Faster modelling with no size limitations
- Integration with PVcase Ground Mount
- Improved ability to represent physical reality
- Physics-based simulation support for bifacial and HSAT systems

Meet the Leadership Team

**David
Trainavicius**
CEO

10+ years of solar engineering experience in different European markets

Repeat founder. The first company was also solar-focused

**Douglas
Geist**
CSO

15+ years of senior sales leadership experience

**Toma
Dile**
COO

10+ years of Head of HR and Operations experience

5+ years in international IaaS and SaaS companies

**Adam
Pazarauskas**
CPO

7+ years of solar engineering and software product management experience

Fighting Climate Change
Through Software
