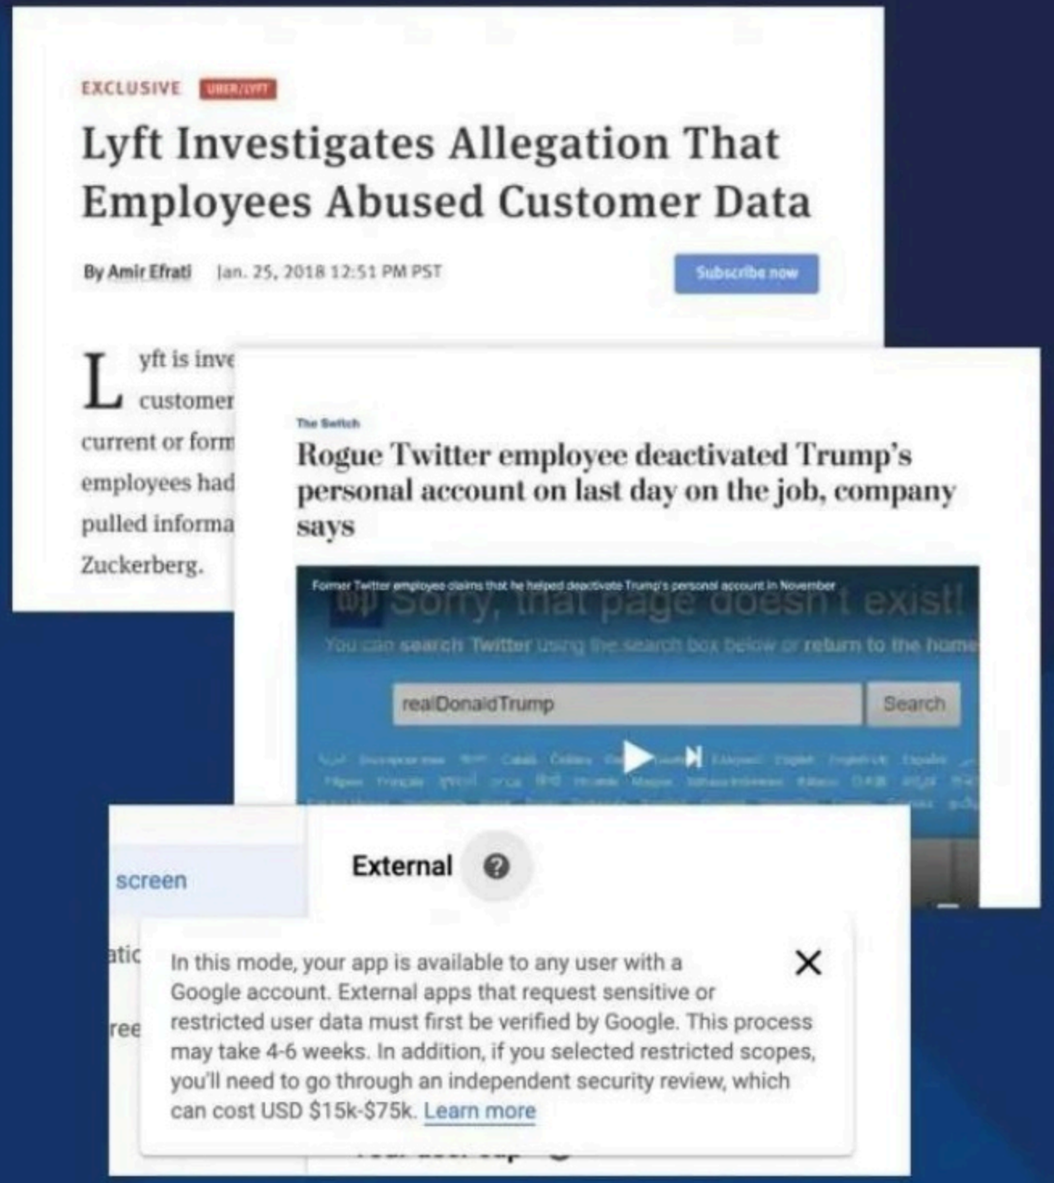
Series B



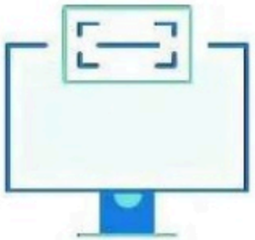
Companies are demanding higher security and compliance standards from vendors

- 2021 was a **record year for data breaches**, with 1,243 security incidents affecting over 5B records.
- The shift to **cloud-based systems** is making sensitive data more accessible remotely
- **AI-driven business models** are increasing the amount of data being generated

Getting compliant today is demanding

Hundreds of valuable team hours lost to audit work

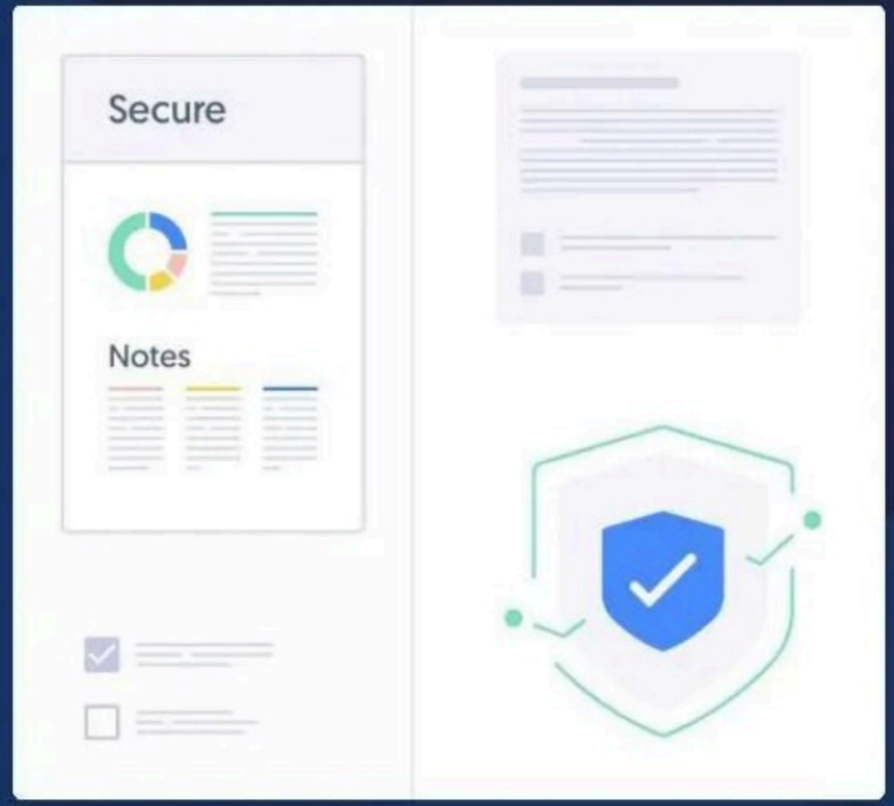
Tedious evidence collection process is overly manual



Stress from lack of guidance and support

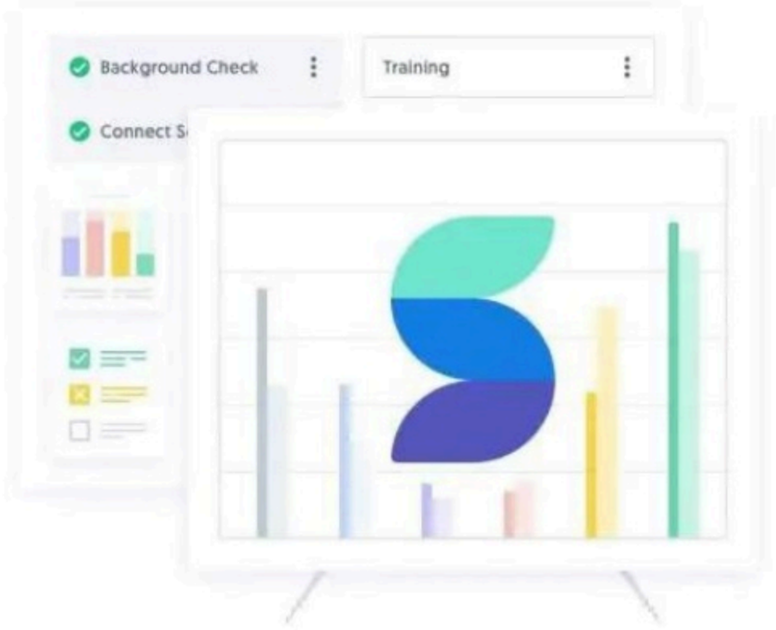
Most startups starting
the SOC 2 or ISO 27001 process
won’t end up finishing

We believe it should be **simple** for any organization to follow **rigorous security & compliance** practices without being security experts



About Secureframe

Achieving compliance can take months, slowing a company's speed-to-market and hindering sales. We believe security – when done right – accelerates innovation and growth. That's why we built Secureframe.



2020

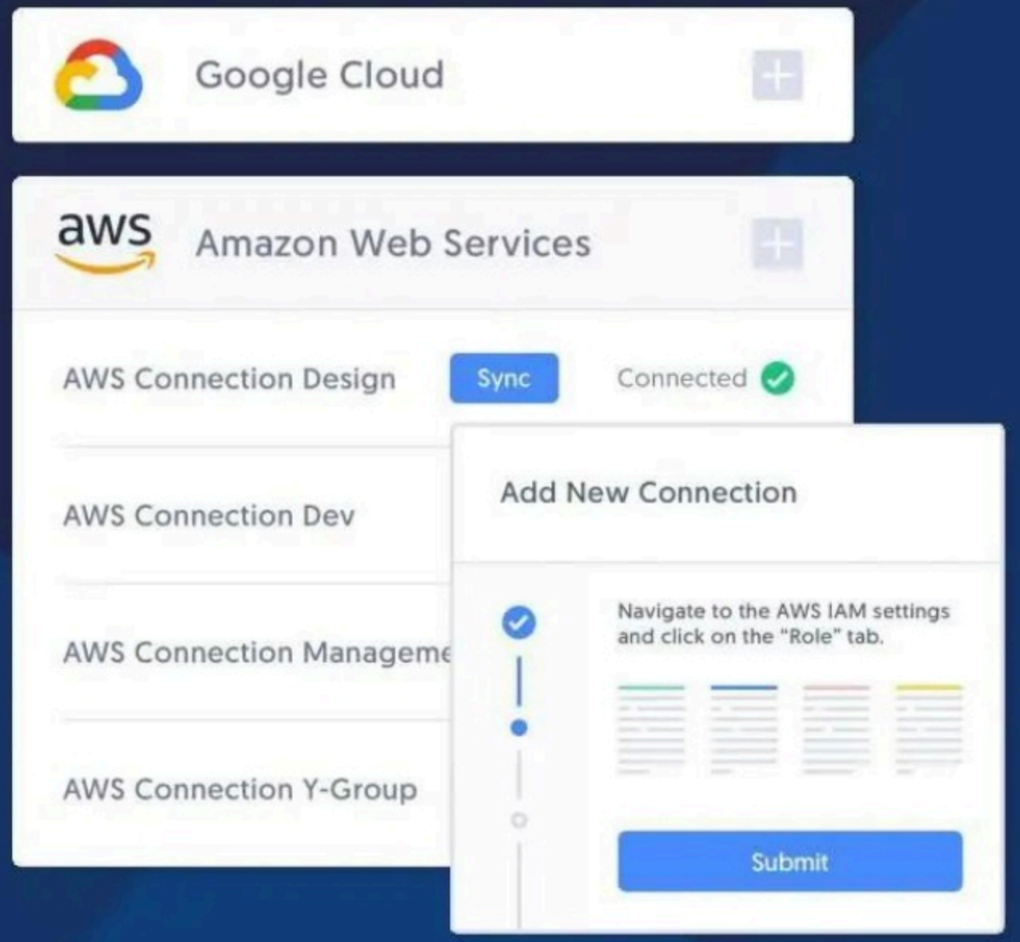
Secureframe is the only platform purpose-built to automate security and compliance

Secureframe helps companies navigate complex security and privacy compliance requirements to **get compliant within weeks, rather than months.**

With a scalable, automated evidence collection data approach

The only platform that supports **multiple cloud data systems** all at once, no matter how complex your data environment is today or tomorrow

The only platform that supports **multiple accounts across integrations** like Business Suites, HR tools, and Dev tools etc.



Our Customers Love Us

“Secureframe is a key unlock to target markets we’d like to go after. Right now that is US enterprises. Tomorrow that may be healthcare, government, or international.”

“Our team really likes the automated alerts on lots of important security areas, such as ‘Are your S3 buckets encrypted?’ ‘Did we deactivate all linked accounts after an employee’s last day?’”
