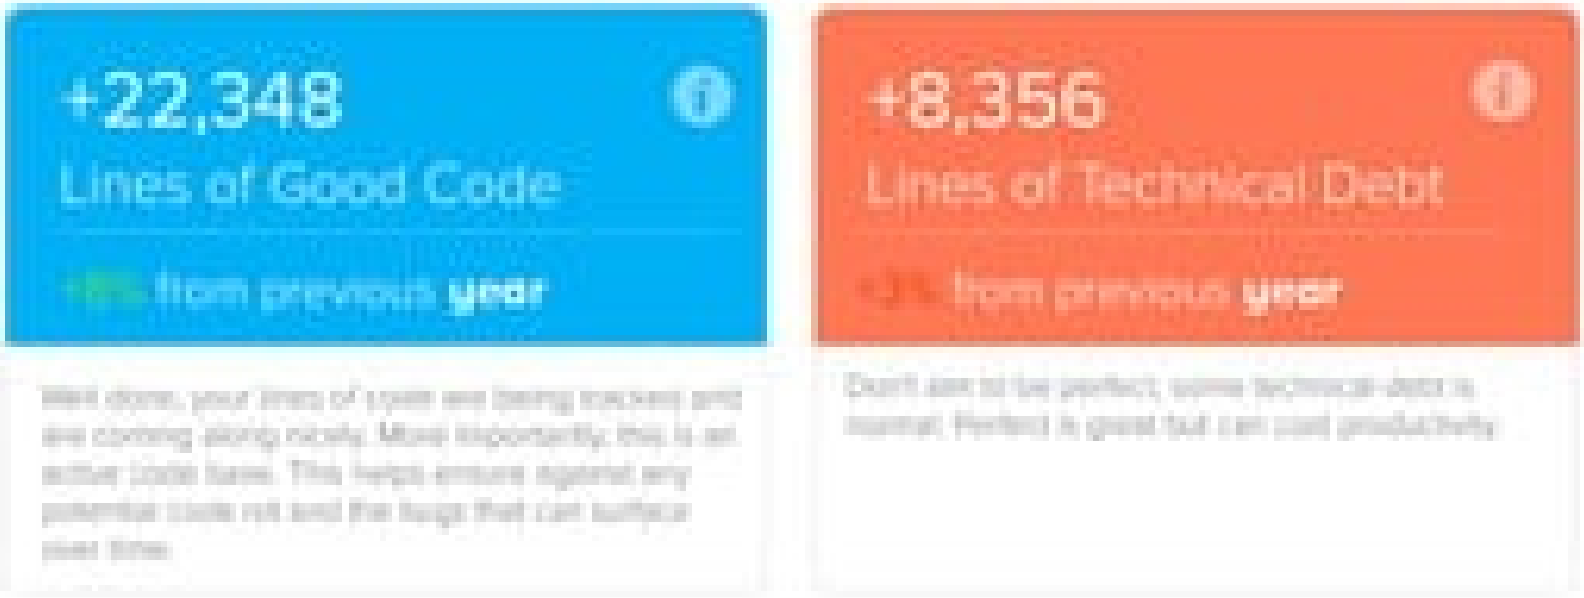
Bliss consolidates productivity and code quality metrics from source control, static analysis and issue tracking to help engineering managers make informed decisions.

By analyzing every line of code, the metric differences are per commit. We map these changes to developer/ team and issues/features.

proprietary & confidential



Easy to understand dashboard view for engineering managers. Configurable based on company's quality goals.

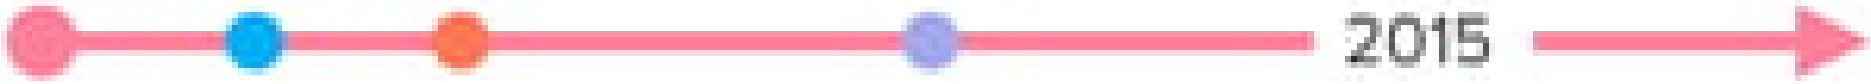
We've built a scalable system for running parallel code reviews. Allowing hundreds hours of analysis to be run in minutes.

proprietary & confidential

TIMELINE

January
Initial concept. 50+ customer development meetings

February
Wireframed, designed, developed and launched Feb 27th



TRACTION
as of today

- 70 paying customers
- $84,000 annual revenue run rate
- 90% margins
- Over 10,000 repositories reviewed
- Over 1 billion lines of code reviewed

proprietary & confidential

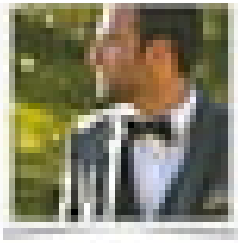
Our initial focus was on startups for faster sales cycles and more homogeneous stacks.

*exclusively focused on startups from March 2015 through June 2015

Roger Graves

Co-founder/CTO of Cloverpop
backed by True Ventures

"Bliss is my wing-man when explaining what technical debt is and why it's important to spend resources reducing it."



Noah Abelson

Co-founder/CEO of ShareRoot
backed by 500 Startups

"Having visibility into my code has helped me be a better CEO and have impactful conversations with my development team ."

proprietary & confidential

Configurable static analysis deployed behind firewall.
Output sent to cloud for proprietary dashboarding blended with data from tools like JIRA, GitHub enterprise and CI services.

- ✓ Configurable
- ✓ Installable in private cloud or data center
- ✓ Roll-up reporting

Enterprise Customers

proprietary & confidential

Enterprise

- Starts at $1,500/months for 50 active repositories and dashboard views

Website

- Monthly subscription per repository
- $29/month (1 repository) to $249/month (10 repositories)

proprietary & confidential

Raising a $750k seed round via convertible equity financing.

$500k already committed, $250k remaining, 20% discount

Use of proceeds

Additional hires: Engineers (2), Product (1) Sales Development Rep (2)

Enterprise deployment optimization

Validate various marketing tactics for customer acquisition

Milestones

1k paying customers

$1m ARR

50 enterprise customers

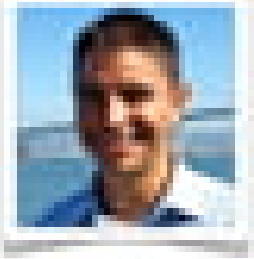
TEAM



Brian York

CEO

Self-funded 3 businesses to profitability. Most recently Encore.io $500k revenue in first year.

Ian Connor

CTO

Previously CTO/Co-founder at Pubget. Acquired by Copyright Clearance Center with 4x return to investors.

INVESTORS

Mike Edelhart

Lead partner at Social Starts

Jun Li

Investor via BeyondSoft Ventures

Bhavin Shah

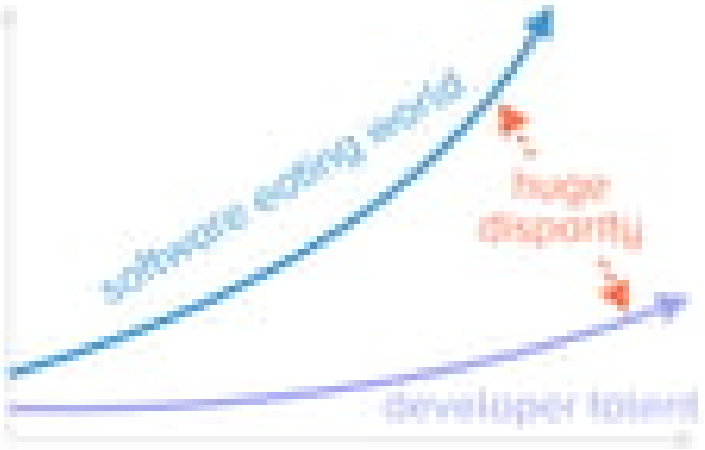
CEO of Refresh (acquired LinkedIn)

David Koehn

Oracle executive

proprietary & confidential

1 Software eating the world, but engineering talent not at the same pace.



2 Huge shift to remote working.

"...in 2014, 3.2 million Americans worked remote."

The New York Times

"...by 2020, 40% of the U.S. workforce will be independent workers."

Bliss consolidates productivity and code quality metrics from source control, static analysis and issue tracking to help engineering managers make informed decisions.

By analyzing every line of code, the metric differences are per commit. We map these changes to developer/ team and issues/features.

proprietary & confidential

PRODUCTIVITY

There's no one-size-fits-all metric and output is fragmented across different tools.

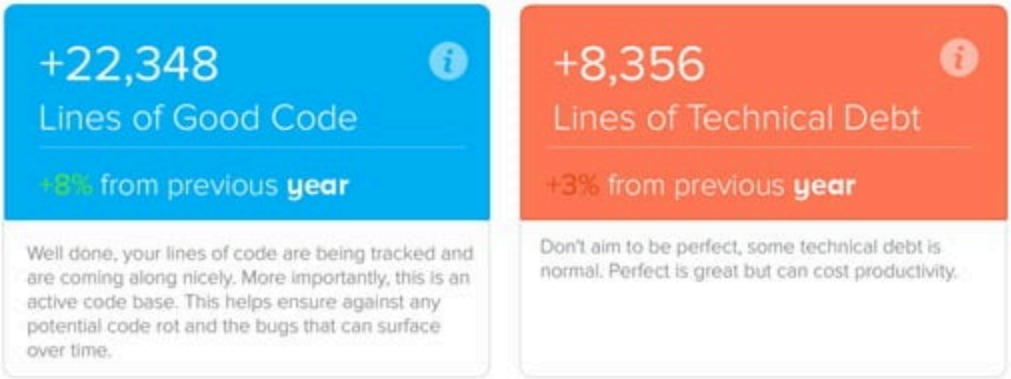
VISIBILITY

Limited visibility into development for non-technical team members.

QUALITY

Inconsistent reporting of code quality across divisions within an organization.

proprietary & confidential



Easy to understand dashboard view for engineering managers. Configurable based on company's quality goals.
