

The room anxiously focused on the 35 remaining occupied chairs, 10 of which would leave empty-handed and 450 that already had. The cards slid across the felt in ordinary fashion, but as I peered them up just enough to catch a glimpse, I knew my patience had been rewarded. A player before me announced a raise, shifting my mind into sixth gear. I had played next to him for 14 hours the previous day, so I knew his strengths, weaknesses, faulty tendencies and could gauge his aggression before he acted. I had acted the part of a young, naive kid and partook in friendly banter, which resulted in his kindly revealing more to me about his cards and playing style. Announcing "all in", I shoved my chip stack to the center of the table as the others folded to my new foe. He finally called my bet and, to my delight, revealed his hand. The numbers and odds involuntarily flashed through my head – he had a 10% shot at making a straight or three of a kind and, after factoring in his cards both being diamonds he had an added 4% chance to win with a flush. It was that unfortunate 4% that did me in as the impartial dealer laid out eight, four, two – all diamonds. My opponent's air and queue instantly went from a six-to-one under-dog to undefeatable. The one hand had cost me a guaranteed \$20,000 and a chance at more than half a million dollars. I exited the casino, greeted by the frigid, foreign, February air of Copenhagen. At that moment, I could not have foreseen that the mathematical and analytical skills I honed at the poker table would soon

Romeo and Juliet Final Project

Cheng Jintao
"I Would Still Love You"

The idea I have chosen for my final project is a song. I have reworked Demi Lovato's fun, upbeat track "Trainwreck," by adding in the meaningful themes of Romeo and Juliet. **I feel like** the lyrics really bring the story to life from beginning to end because it defines **the whole love situation**. I went through every line to make sure that each word has an important meaning.

I know you are wondering why I chose a song by Demi Lovato, but I have my reasons. The original song was a **very emotional and meaningful track**, as well as a very good description of Romeo and Juliet's first encounter. "You asked me to dance instead I said no way, inside I was dying to give it a try and you begged me so I caved." As similar as those lyrics are to the story, I just didn't feel like that point was important enough. Following my instincts, I went with a more crucial plot. I did use one line from the original song that really made sense. **"We were so different, but opposites attract."** **I feel like that line highlighted the issue that the couple had.** By adding it to my version of the song, I was able to emphasize the clash. When I put it all together with the following themes, the song becomes **perfect to my eyes** because it is the story of Romeo and Juliet.

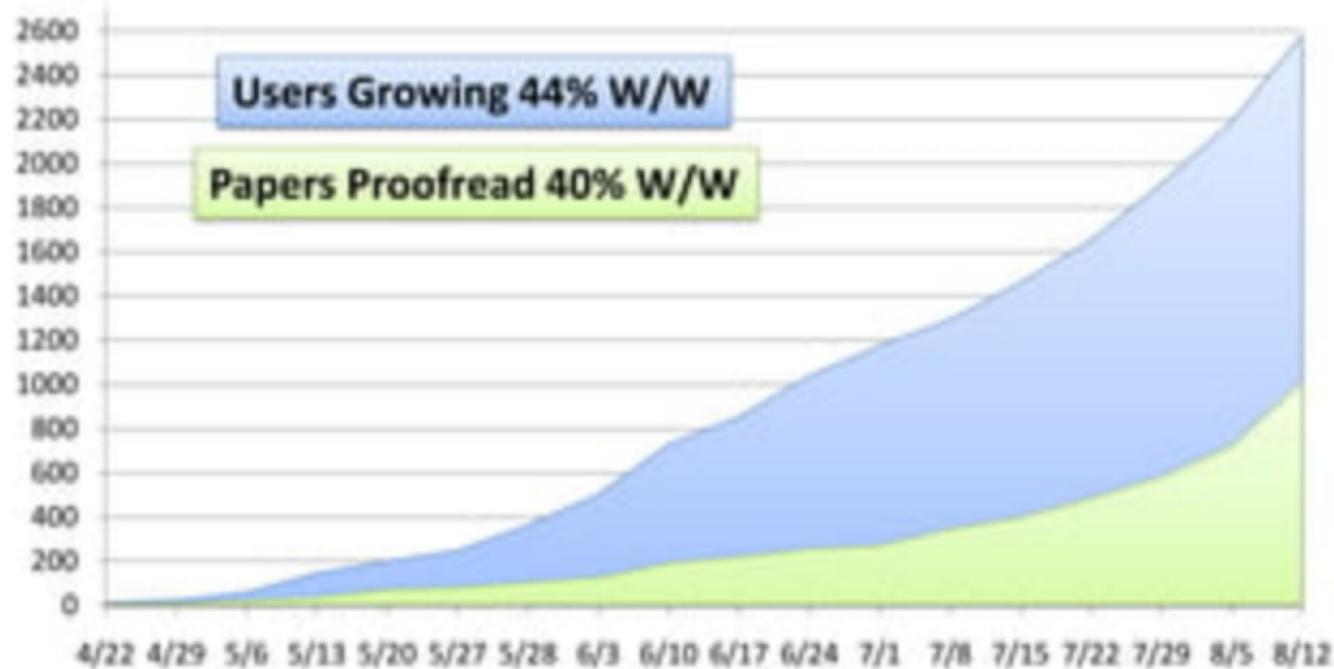

The themes for my project are, "Love Conquers All" and "Violence is Not the Answer to Everything." My first theme, "Love Conquers All," is shown throughout the whole **entire** song, but **most so in a few specific lines.** "The feud was stupid, but I would still love you either way. **Change Like I?** **To me** this line shows that Juliet is willing to push the feud aside and love Romeo unconditionally **no matter what.** **I** also brings me back to when Romeo had unwillingly slain Tybalt illegally, yet Juliet still loved Romeo more. My second theme is "Violence is Not the Answer to Everything." Romeo and Juliet **make that a valid point** by putting their families' differences aside and loving each other. **Building**

the lyrics really bring the story to life from beginning to end because it defines **the whole love situation**. I went through every line to make sure that each word **is** an important meaning.

I know you are wondering why I chose a song by Diesel Lovato, but I have my reasons. The original song was a **very emotional and beautiful** track, as well as a very good description of Romeo and Jil. **Comment:** I said no way, dude! I was dying to give **This is your main point. This should be moved to the top of the whole format of getting on in the class.** I my sentence, I went with a more crucial pt. **or how** I made sense. **"My work is different, but my work is not a very good description of Romeo and Jil. The original song was a very emotional and beautiful track, as well as a very good description of Romeo and Jil. By writing it in my version of the song, I was able to emphasize the class. When I put it all together with the following Romeo, the song becomes **perfect** to see how because it is the story of Romeo and Jil.**

The themes for my project are, "Love conquers all" and "Fidelity is Not the Answer to Everything." My first theme, "I see Computers **is** shared throughout the whole **even** song, but **love is in a few specific lines.**" The final was simple, but I would still love you either way. **Choose Line 9:** For me this line shows that Jil is willing to push the final aside and love Romeo unconditionally **you wonder what** **is** also helps me back to when Romeo had said that's

1 / What do you think this is a weak...
2 / I agree...
3 / The whole love situation...
4 / What do you mean...
5 / I think you are...

Romeo and Juliet Final Project

(Song lyrics)
"I Would Still Love You"

The idea I have chosen for my final project is a song. I have recreated Demi Lovato's fun, upbeat track "Trainwreck," by adding in the meaningful themes of Romeo and Juliet. I feel like the lyrics really bring the story to life from beginning to end because it defines the whole love situation. I went through every line to make sure that each word has an important meaning.

I know you are wondering why I chose a song by Demi Lovato, but I have my reasons. The original song was a very emotional and meaningful track, as well as a very good description of Romeo and Juliet's first encounter. "You asked me to dance instead I said no way, inside I was dying to give it a try and you begged me so I caved." As similar as those lyrics are to the story, I just didn't feel like that point was important enough. Following my instincts, I went with a more crucial plot. I did use one line from the original song that really made sense, "We were so different, but opposites attract." I feel like that line highlighted the issue that the couple had. By adding it to my version of the song, I was able to emphasize the clash. When I pull it all together with the following themes, the song becomes perfect in my eyes because it IS the story of Romeo and Juliet.

The themes for my project are, "Love Conquers All" and "Violence is Not the Answer to Everything." My first theme, "Love Conquers All", is shown throughout the whole entire song; but more so in a few specific lines. "The feud was stupid, but I would still love you either way. Chorus-Line 6" To me this line shows that Juliet is willing to push the feud aside and love Romeo unconditionally no-matter-what. It also brings me back to when Romeo had unwillingly slain Tybalt illegally, yet Juliet still loved Romeo more. My second theme is "Violence is Not the Answer to Everything." Romeo and Juliet make that a valid point by putting their families differences aside and loving each other, therefore

Mathematics holds a key position in the school curriculum as a
a core component of the school curriculum. It is also seen as a pivotal subject, more so in
its own right, and also because of its **important connections in diverse fields** such as the natural
sciences, engineering, medicine, and the social sciences (Smith, 2000). However, for the past
three decades, there has been a growing concern about the falling standards of students'
achievements in mathematics at **both** national and international levels (Dixon 2002; Times
and Strickman 2003).
