MedStack

enables Healthcare Enterprises to adopt

apps as tools for care

by making them

easier to build, discover and integrate

We are experts in ecosystems and platforms, digital security and healthcare technology, and passionate startup advocates

(c) 2017 MedStack Inc.

hello@medstack.io
@getmedstack

Building a healthcare app costs

$100K

more in legal fees, server ops, security design

330,000 health apps in the market, but

5%

are healthcare integration-ready

(c) 2021 MedStack Inc.

luke@medstack.io
angela@medstack.io

IT Diligence processes at Healthcare Enterprises don't have the capacity to support app adoption at scale.

(c) 2021 MedStack Inc.

MedStack standardizes healthcare app security, privacy and integration architecture to accelerate adoption.

BioVitua

"MedStack has allowed us to focus on our core business. The fact that we haven't reacted to worry about hosting is a huge testament to the service quality that MedStack provides."

"Given that the protection of our Users' personal health information is our highest priority, we could not have launched without MedStack's solution."

"MedStack up to enterprise security requirements and our smaller group practice customers. Highly recommended!"

"I point out how easily MedStack took care of the heavy lifting with the server side of things, and setting us up with the best HIPAA consultant I have ever talked with."

"MedStack's service saved us a lot of time and money with their HIPAA compliance out-of-the-box solution."

(c) 2021 MedStack Inc.

Coming Soon

AI-Based Security Diligence

Automated completion of Enterprise security assessments for apps based on MedStack architecture

Active Compliance Monitoring

MedStack Monitoring System automatically checking and reporting on security and privacy commitments

MedStack Enterprise

(late 2017)

- Hosting environment for multiple apps
- Dedicated to the hospital
- Standardized security and interoperability
- App provisioning, security, analytics
- Marketplace for promotion of hospital innovation needs and app discovery

Discovery | Provisioning | Security controls | Analytics
